DIGEST

SB 94 Original 2023 Regular Session Kleinpeter

Present law adds the substances mitragynine and 7-Hydroxy-mitragynine to the controlled dangerous substances schedules of the Uniform Controlled Dangerous Substances Law contingent upon the U.S. Drug Enforcement Administration (DEA) classifying those substances under corresponding federal schedules.

Proposed law deletes present law except to provide that mitragynine and 7-Hydroxy-mitragynine are Schedule I controlled dangerous substances under the Uniform Controlled Dangerous Substances Law and removes the condition of action by the DEA.

Effective August 1, 2023.

(Repeals Sec. 2, 3, 4, 5, and 7 of Act 231 of the 2019 R.S.)
