--	---

Bill Header: RETIREMENT/LOCAL: Provides relative to retirement eligibility and benefits for new hires in the Firefighters' Pension and Relief Fund in the city of New Orleans.

Cost Summary:

The estimated actuarial and fiscal impact of the proposed legislation is summarized below. Actuarial costs pertain to changes in the *actuarial present value of future benefit payments*. A cost is denoted by "Increase" or a positive number. Savings are denoted by "Decrease" or a negative number.

Actuarial Cost to Retirement Systems	Decrease
Total Five Year Fiscal Cost	
Expenditures	Decrease
Revenues	Decrease

Estimated Actuarial Impact:

The chart below shows the estimated change in the *actuarial present value of future benefit payments*, if any, attributable to the proposed legislation. A cost is denoted by "Increase" or a positive number. Savings are denoted by "Decrease" or a negative number. Present value costs associated with administration or other fiscal concerns are not included in these values.

<u>Actuarial Cost to:</u>	<u>Change in the Actuarial Present Value</u>
All Louisiana Public Retirement Systems	Decrease
Other Post Retirement Benefits	Decrease
Total	Decrease

This bill complies with the Louisiana Constitution which requires unfunded liabilities created by an improvement in benefits to be amortized over a period not to exceed ten years.

Estimated Fiscal Impact:

The chart below shows the estimated fiscal impact of the proposed legislation. This represents the effect on cash flows for the retirement systems and other government entities. Fiscal costs include estimated administrative costs and costs associated with other fiscal concerns. A fiscal cost is denoted by "Increase" or a positive number. Actuarial or fiscal savings are denoted by "Decrease" or a negative number.

**2016 REGULAR SESSION
ACTUARIAL NOTE HB 56**

Bill Information:

Current Law

Current law establishes the Firefighters' Pension and Relief Fund in the City of New Orleans (NOFF) for the benefit of individuals employed by the fire department in the City of New Orleans who are actively engaged in extinguishing fires.

Under current law, a member of NOFF whose first employment makes him eligible to participate in the system on or after January 1, 2015 is eligible to receive a retirement benefit upon attaining age 52 with 12 or more years of creditable service. Such a member will accrue benefits at a rate of 2.75% for each year of service multiplied by his final average compensation.

A member who terminates employment with at least 12 years of service but before attainment of age 52 will be eligible to receive retirement benefits when he attains age 52.

Proposed Law

HB 56 creates a new tier of retirement benefits for members of NOFF who are first employed on or after January 1, 2017.

	For Members of NOFF Hired on or after January 1, 2017	
	Current Provisions	Provisions under HB 56
Normal Retirement Eligibility	Age 52 with 12 or more years of service.	Age 57 with 12 or more years of service.
Accrual Rate	2.75%	2.50%
Retirement Benefit	2.75% x years of service x final average compensation	2.50% x years of service x final average compensation
Termination of Employment	A member who is less than age 52 and who terminates employment with 12 or more years of service may retire when he attains age 52.	A member who is less than age 57 and who terminates employment with 12 or more years of service may retire when he attains age 57.
Death after Termination of Employment	A survivor of a member who 1. Dies after terminating employment 2. Has 12 or more years of service 3. Has not yet attained age 52 will be entitled to a survivor benefit based on an accrual rate of 2.75% per year of service.	A survivor of a member who 1. Dies after terminating employment 2. Has 12 or more years of service 3. Has not yet attained age 57 will be entitled to a survivor benefit based on an accrual rate of 2.50% per year of service.

Implications of the Proposed Changes

HB 56 creates a new tier of benefits for members of NOFF hired on or after January 1, 2017.

Cost Analysis:

Analysis of Actuarial Costs

HB 56 does not contain any benefit provisions having an actuarial cost.

Retirement Systems

HB 56 has no effect on current members of NOFF. The actuarial present value of future benefit payments for existing members will not change. HB 56 has no effect on accrued liabilities for existing members because it only applies to members first employed on or after January 1, 2017.

HB 56 provides for smaller benefit accrual rates, later retirement ages, and smaller death benefits for those who terminate employment without being eligible for immediate retirement. As a result, the present value of future benefit payments for members joining the system on or after January 1, 2017 will decrease. Future normal costs and future employer contribution requirements will also decrease. However, the effect of HB 56 on employer contribution requirements will be gradual. Initially, the difference in contribution requirements will be small. However, savings will increase over time as old members leave the system and are replaced with new members.

Other Post-Employment Benefits

Actuarial costs associated with post-employment benefits other than pensions are expected to decrease to the extent that the City of New Orleans provides such benefits to its firefighters. Because members will be retiring later under HB 56 than under current law, NOFF members will be entitled to these benefits for a shorter period of time and actuarial costs will decrease.

**2016 REGULAR SESSION
ACTUARIAL NOTE HB 56**

Analysis of Fiscal Costs

HB 56 will have the following effect on fiscal costs.

Expenditures:

1. Benefit payments from NOFF (Agy Self-Generated) will not change during the 5-year measurement period. Benefit reductions for members hired on or after January 1, 2017 will not have any effect on distributions from the system until a new member has earned at least 12 years of service.
2. Expenditures from Local Funds will decrease because employer contribution requirements will decrease. This decrease will first occur for FYE 2018.

Revenues:

- NOFF revenues (Agy Self-Generated) will decrease to the extent that employer contribution requirements decrease.

Actuarial Data, Methods and Assumptions

This actuarial note was prepared using actuarial data, methods, and assumptions as disclosed in the most recent actuarial valuation report of the retirement system. This data, methods and assumptions are being used to provide consistency with the actuary for the retirement system who may also be providing testimony to the Senate and House retirement committees.

Actuarial Caveat

There is nothing in HB 56 that will compromise the signing actuary's ability to present an unbiased statement of actuarial opinion.

Actuarial Credentials:

Paul T. Richmond is the Manager of Actuarial Services for the Louisiana Legislative Auditor. He is an Enrolled Actuary, a member of the American Academy of Actuaries, a member of the Society of Actuaries and has met the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinion contained herein.

Dual Referral:

Senate

- 13.5.1: Annual Fiscal Cost \geq \$100,000
- 13.5.2: Annual Tax or Fee Change \geq \$500,000

House

- 6.8(F)(1): Annual Fiscal Cost \geq \$100,000
- 6.8(F)(2): Annual Revenue Reduction \geq \$100,000
- 6.8(G): Annual Tax or Fee Change \geq \$500,000
