EXPENDITURE EXPLANATION

Proposed law may increase expenditures by an indeterminable, though likely nominal amount, across all state departments. The proposed legislation requires secretaries of state departments to coordinate any programs and efforts associated with the reduction of poverty in Louisiana, including providing information regarding other such programs in other state departments. In addition, the proposed law requires each department to produce a report detailing its actions to carry out the provisions of the proposed legislation. Furthermore, proposed law does not contemplate coordination between agencies in a formal setting, such as an open public meeting of a new subdivision of state government (council, commission, ad hoc subcommittee, etc.). Therefore, it is assumed that coordination between departments will be informal in nature, and likely absorbed within each department's existing resources and budget authority. Furthermore, production of a report detailing actions each department undertaken to further provisions of proposed law may result in an incremental workload increase that can likely be absorbed within each department's existing resources and budget authority.
