Provides for the repeal of the hospital prospective reimbursement methodology. (8/1/18)

Present law provides major teaching hospitals with an opportunity for Medicaid reimbursement based upon a hospital prospective reimbursement methodology in which Medicaid payments are made if a hospital is affiliated with an accredited Louisiana medical school that participates in at least four approved residency programs, of which two are in medicine, surgery, obstetrics, pediatrics, family practice, emergency medicine, or psychiatry, or maintains an intern and resident full-time equivalency of at least 20 filled positions. Proposed law repeals present law. Proposed law shall only become effective upon implementation of a diagnosis related group hospital payment methodology pursuant to an approved state plan amendment by the Centers for Medicaid and Medicare Services.

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure. The LA Dept. of Health reports that repealing the definition of a "major teaching hospital" regarding the hospital prospective reimbursement methodology in present law is not anticipated to affect expenditures for the department, because "major teaching hospital" is currently defined in the Medicaid state plan. LDH further reports that it anticipates all hospitals meeting the criteria of "major teaching hospital" to meet the criteria in future years. However, to the extent LDH changes the definition of a "major teaching hospital" in the Medicaid state plan as a result of proposed law, expenditures may be affected in the future.

REVENUE EXPLANATION

There is no anticipated direct material effect on governmental revenues as a result of this measure.
