

RÉSUMÉ DIGEST

ACT 448 (HB 116)

2018 Regular Session

Zeringue

Existing law authorizes the executive director of the Coastal Protection and Restoration Authority (CPRA) to use his contracting authority, or the contracting authority of any state department or agency, for the operation and maintenance of an integrated coastal protection project. Specifies that the contracting authority includes construction management at risk, operation and maintenance, design-build, design-build-operate and maintain, design-build-finance-operate and maintain, outcome-based performance contracts, or any combination of design, construction, finance, and services.

New law requires the CPRA to promulgate, through the Administrative Procedure Act, rules, regulations, or guidelines for the implementation of the contracting authority.

New law requires sunset review of the CPRA and the CPRA Board for July 1, 2023. Further provides for a sunset review every six years thereafter to coincide with the review and adoption of the comprehensive master plan for coastal restoration.

Effective August 1, 2018.

(Amends R.S. 49:214.6.2(A); Adds R.S. 49:191(11)(a))
