Abstract: Extends the postaccident drug testing requirement to accidents involving serious bodily injury.

<u>Present law</u> requires the operator of any motor vehicle or watercraft involved in a collision, crash, or other casualty in which a fatality occurs be administered a chemical test or tests of his blood, urine, or other bodily substance for the purposes of determining the presence of any abused or controlled dangerous substance.

<u>Proposed law</u> extends this requirement to the operator of any motor vehicle or watercraft involved in a collision, crash, or other casualty in which a serious bodily injury occurs.

<u>Present law</u> requires the test or tests be administered at the direction of a law enforcement officer having reasonable grounds to believe the person driving or in actual physical control of a motor vehicle or watercraft involved in a collision, crash, or other casualty in which a fatality occurs.

<u>Proposed law</u> extends this requirement to the person driving or in actual physical control of a motor vehicle or watercraft involved in a collision, crash, or other casualty in which a serious bodily injury occurs to determine the presence of any abused substance or controlled dangerous substance.

<u>Proposed law</u> defines "serious bodily injury" as a bodily injury which involves unconsciousness, extreme physical pain, protracted and obvious disfigurement, or protracted loss or impairment of the function of a bodily member, organ, or mental faculty, or a substantial risk of death.

(Amends R.S. 32:681(Section heading), (A), and (B); Adds R.S. 32:681(E))
