

RÉSUMÉ DIGEST

ACT 236 (HB 482)

2019 Regular Session

Gary Carter

Existing law requires a superintendent, principal, or other leader of a public school who is required to develop an academic improvement plan to publicly present the plan within a specified time frame. Prior law required such presentation within 60 days of state Dept. of Education (DOE) approval. New law requires presentation within 60 days of the beginning of the school year if DOE has approved the plan or, if the school year begins without approval, within 60 days of approval. New law additionally requires:

- (1) Schools to involve parents in plan development.
- (2) Local superintendents to report presentation dates to DOE by Dec. 1st annually.

New law requires DOE to report to the House and Senate education committees relative to school compliance with plan requirements by March 1st of 2020, 2021, and 2022. New law repeals new law.

Effective August 1, 2019; repeal of new law, relative to annual reports, effective March 1, 2022.

(Amends R.S. 17:10.1(I)(1); Adds R.S. 17:10.1(I)(5); Repeals R.S. 17:10.1(I)(5))
