

**2021 REGULAR SESSION
ACTUARIAL NOTE SB 13**

<p>Senate Bill 13 SLS 21RS-57 Enrolled</p> <p>Author: Senator Price Date: May 25, 2021 LLA Note SB 13.03</p> <p>Organizations Affected: Louisiana State Police Retirement System</p> <p>EN INCREASE APV</p>	<p>This Note has been prepared by the Actuary for the Louisiana Legislative Auditor (LLA) with assistance from either the Fiscal Notes staff of the Legislative Auditor or staff of the Legislative Fiscal Office (LFO). The attachment of this Note provides compliance with the requirements of R.S. 24:521 as amended by Act 353 of the 2016 Regular Session.</p>	
	 James J. Rizzo, ASA, EA, MAAA Senior Consultant & Actuary Gabriel, Roeder, Smith & Company	 Piotr Krekora, ASA, EA, MAAA, PhD Senior Consultant & Actuary Gabriel, Roeder, Smith & Company

Bill Header: STATE POLICE RETIREMENT. Allows upgrade of accrual rate applicable to transferred service credit. (gov sig)

Cost Summary:

The estimated net actuarial and fiscal impact of this proposed legislation on the retirement systems and their plan sponsors is summarized below. Net Actuarial Present Values pertain to estimated changes in the *net actuarial present value of future benefit payments and administrative expenses incurred by the retirement system*¹. Net fiscal costs or savings pertain to changes to all cash flows over the next five-year period including retirement system cash flows, OPEB cash flows, or cash flows related to local and state government entities.

An increase in actuarial costs is denoted throughout the actuarial note by “Increase” or a positive number. Actuarial savings are denoted by “Decrease” or a negative number. An increase in expenditures or revenues (fiscal impact) is denoted by “Increase” or a positive number. A decrease in expenditures or revenues is denoted by “Decrease” or a negative number.

Estimated Actuarial Impact:

The top part of the following chart shows the estimated change in the *net actuarial present value of future benefit payments and expenses*, if any, attributable to the proposed legislation. The bottom part shows the effect on cash flows (i.e., contributions, benefit payments, and administrative expenses).

Net Actuarial Present Values Pertaining to:		Net Actuarial Present Values
The Retirement Systems		Increase
Other Post-employment Benefits (OPEB)		0
Total		Increase
Five Year Net Fiscal Cost Pertaining to:	Expenditures	Revenues
The Retirement Systems - Agy Self Generated	Increase	Increase
Other Post-employment Benefits (OPEB)	0	0
Local Government Entities	0	0
State Government Entities	Increase	0
Total	Increase	Increase

Bill Information

Current Law

Current law (R.S. 11:143) provides for the transfer of service credit between systems. The accrual rate of the transferring system will be used to calculate the portion of the benefit based on the service credit transfer. If the accrual rate of the receiving system is greater than that of the transferring system, current law allows the person executing the transfer to purchase the accrual rate of the receiving system for all the transferred service credit. The payment for the purchase of the accrual rate upgrade is calculated on an actuarial basis which totally offsets the increase in accrued liability of the receiving system resulting from the accrual rate adjustment. The purchase must be made at the time the member is transferring into the system, and must cover the whole service credit.

Proposed Law

SB 13 expands the opportunity to purchase the accrual rate upgrade by allowing members to exercise this option any time before retiring or terminating from the System, and adds flexibility by allowing members to upgrade all or a permissible portion of the transferred service credit. A permissible portion is defined as:

- (1) An increment of one full year or more.
- (2) One-time upgrade of the fractional portion of a year.

¹ **Note:** This is a different assessment from the actuarial cost relating the 2/3 vote (refer to the section near the end of this Actuarial Note “Information Pertaining to Article (10)(29)(F) of the Louisiana Constitution”).

**2021 REGULAR SESSION
ACTUARIAL NOTE SB 13**

Implications of the Proposed Changes

More members of LSPRS will likely elect to purchase an upgrade to the accrual rate of LSPRS, since the upgrade can be purchased at any time prior to retirement or termination from the System, and on a permissible portion of their transferred service credit, as opposed to all their transferred service credit under the current law.

Expanding the ability of members to upgrade their accrual rates is expected to open the door to anti-selection by those in better than average health as they near retirement, and to actuarial losses to the extent future experience is not as favorable as the assumptions.

I. ACTUARIAL IMPACT ON RETIREMENT SYSTEMS AND OPEB [Completed by LLA]

**A. Analysis of Net Actuarial Costs
(Prepared by LLA)**

This section of the actuarial note pertains to net actuarial present value costs or savings associated with the retirement systems and with OPEB.

1. Retirement Systems

The net actuarial cost or savings of the proposed legislation associated with the retirement systems is estimated to be an increase in cost. The actuary's analysis is summarized below.

Present law allows a member of LSPRS who has transferred from another system to upgrade his accrual rate on the transferred service at the transfer date. SB 13 expands this option by extending the time to purchase the upgrade and allowing a member to purchase all or a permissible portion of the service credit. It is expected that members who would benefit from this provision are more likely to take advantage of this opportunity and, thereby, derive greater benefits under SB 13 than under current law.

Increases in the actuarial accrued liabilities are intended to be offset by deposits from members exercising this option with an amount determined using actuarial assumptions adopted by the board for the receiving system's valuation. However, members who exercise accrual rate upgrade options are expected to exhibit a degree of anti-selection. That is, they are expected to live longer than is expected by the general mortality tables employed in the purchase price calculations, especially when the option and purchase is exercised near or at the time of retirement. Members who know they are in poor health are not expected to pay tens of thousands of dollars for upgrade purchases because they likely would not expect to recover the price in terms of greater benefits over time. On the other hand, members who know they are in reasonably good health are more likely to pay the purchase price because they likely expect to be able to recover the price through greater benefits over time. General mortality tables employed in the purchase price calculations include a cross-section of health status, some in good health and some in poor health. However, members electing to purchase accrual rate upgrades are not expected to exhibit that same cross-section. Therefore, even though the purchase price is said to be "actuarially equivalent" and financed by the member, accrual rate upgrades are more likely to exhibit anti-selection, with actuarial losses arising over time that would be financed by the State.

Furthermore, the current 7.0% assumed rate of investment return adopted by the LSPRS board of trustees is, in our opinion, an overly optimistic expectation of future returns, as compared to the consensus average expectations for the LSPRS portfolio by considering a survey of numerous national investment forecasting firms. At this time, it is expected that the accrual rate upgrade calculations would utilize the same 7% return assumption until this assumption is revised for valuation purposes. As such, we expect there to be more actuarial losses arising over time from investment returns falling short of assumed levels than actuarial gains from investment returns exceeding assumed levels.

Actuarial losses arising from retirees living longer than expected and from investment returns falling short of assumed rates are amortized over time and financed by the State. Therefore, the cost of the increase in benefits is not expected to be borne entirely by the member through his purchase price. Actuarial losses arising over time that are expected under SB 13, for the reasons identified, may be mitigated to some extent by modifying assumptions used for price determination. However, in the absence of any provisions in the bill requiring such modifications and in the absence of any indications from the trustees or the actuary of modifying the mortality and interest assumption used for the upgrade prices, these expected actuarial losses would be funded by increases in the State's contribution requirements, as compared to what they would be in the absence of SB 13.

Members exercising the expanded options will receive greater benefits under SB 13, for exercising the expanded upgrade option, as compared to what they would receive in the absence of SB 13. Consequently, there is expected to be a net increase in the actuarial present value of benefits and expenses under SB 13, for exercising the expanded upgrade option, as compared to what they would receive in the absence of SB 13.

2. Other Post-employment Benefits (OPEB)

The net actuarial cost or savings of the proposed legislation associated with OPEB, including retiree health insurance premiums, is estimated to be \$0. The actuary's analysis is summarized below.

The liability for post-retirement medical insurance subsidies provided to retirees is not affected by the purchase of the accrual rate of LSPRS to a permissible portion of the transferred service credit by some members of the system.

**2021 REGULAR SESSION
ACTUARIAL NOTE SB 13**

**B. Actuarial Data, Methods and Assumptions
(Prepared by LLA)**

Unless indicated otherwise, the actuarial note for the proposed legislation was prepared using actuarial data, methods, and assumptions as disclosed in the most recent actuarial valuation report adopted by the Public Retirement Systems' Actuarial Committee (PRSAC). The data, methods and assumptions are being used to provide consistency with the actuary for the retirement system who may also be providing testimony to the Senate and House retirement committees. With certain exceptions, the actuary for the LLA finds the assumptions used by the retirement systems and PRSAC to be reasonable.

**C. Actuarial Caveat
(Prepared by LLA)**

There is nothing in the proposed legislation that will compromise the signing actuary's ability to present an unbiased statement of actuarial opinion.

II. FISCAL IMPACT ON RETIREMENT SYSTEMS AND OPEB [Completed by LLA]

This section of the actuarial note pertains to fiscal (annual) costs or savings associated with the retirement systems (Table A) and with OPEB (Table B). Fiscal costs or savings in Table A include benefit-related actuarial costs and administrative costs incurred by the retirement systems.

**A. Estimated Fiscal Impact – Retirement Systems
(Prepared by LLA)**

1. Narrative

Table A shows the estimated fiscal impact of the proposed legislation on the retirement systems and the government entities that sponsor them. A fiscal cost is denoted by "Increase" or a positive number. Fiscal savings are denoted by "Decrease" or a negative number. A revenue increase is denoted by "Increase" or a positive number. A revenue decrease is denoted by "Decrease" or a negative number.

Retirement System Fiscal Cost: Table A

EXPENDITURES	2021-22	2022-23	2023-24	2024-25	2025-26	5 Year Total
State General Fund	\$ 0	Increase	Increase	Increase	Increase	Increase
Agy Self Generated	Increase	Increase	Increase	Increase	Increase	Increase
Stat Deds/Other	0	0	0	0	0	0
Federal Funds	0	0	0	0	0	0
Local Funds	0	0	0	0	0	0
Annual Total	Increase	Increase	Increase	Increase	Increase	Increase

REVENUES	2021-22	2022-23	2023-24	2024-25	2025-26	5 Year Total
State General Fund	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
Agy Self Generated	Increase	Increase	Increase	Increase	Increase	Increase
Stat Deds/Other	0	0	0	0	0	0
Federal Funds	0	0	0	0	0	0
Local Funds	0	0	0	0	0	0
Annual Total	Increase	Increase	Increase	Increase	Increase	Increase

All expenditures for employer contributions are reflected on a single line in the table above. The actual sources of funding (e.g., Federal Funds, State General Fund) may vary by employer and are not differentiated in the table.

The proposed legislation will have the following effects on retirement related fiscal costs and revenues during the five year measurement period.

2. Expenditures:

- a. Expenditures by LSPRS (Agy Self Generated) are expected to increase since greater benefits will be paid to members purchasing an upgrade in the accrual rate.
- b. Expenditures from the State General Fund are expected to increase slightly over time because amortization payments would be required due to actuarial losses expected, as described in section I(A)(1) above .

3. Revenues:

LSPRS revenues (Agy Self Generated) are expected to increase since lump sum payments for the purchase of the accrual rate of LSPRS to a permissible portion of the transferred service credit by some members will be received and because receipts of State contributions are expected to increase slightly over time because amortization payments would be required due to actuarial losses expected, as described in section I(A)(1) above.

**2021 REGULAR SESSION
ACTUARIAL NOTE SB 13**

Estimated Fiscal Impact – OPEB
(Prepared by LLA)

1. Narrative

Table B shows the estimated fiscal impact of the proposed legislation on actuarial benefit and administrative costs or savings associated with OPEB and the government entities that sponsor these benefit programs. A fiscal cost is denoted by “Increase” or a positive number. Fiscal savings are denoted by “Decrease” or a negative number. A revenue increase is denoted by “Increase” or a positive number. A revenue decrease is denoted by “Decrease” or a negative number.

OPEB Fiscal Cost: Table B

EXPENDITURES	2021-22	2022-23	2023-24	2024-25	2025-26	5 Year Total
State General Fund	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
Agy Self Generated	0	0	0	0	0	0
Stat Deds/Other	0	0	0	0	0	0
Federal Funds	0	0	0	0	0	0
Local Funds	0	0	0	0	0	0
Annual Total	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0

REVENUES	2021-22	2022-23	2023-24	2024-25	2025-26	5 Year Total
State General Fund	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
Agy Self Generated	0	0	0	0	0	0
Stat Deds/Other	0	0	0	0	0	0
Federal Funds	0	0	0	0	0	0
Local Funds	0	0	0	0	0	0
Annual Total	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0

All expenditures for employer contributions are reflected on a single line in the table above. The actual sources of funding (e.g., Federal Funds, State General Fund) may vary by employer and are not differentiated on the table.

The proposed legislation will have the following effects on OPEB related fiscal costs and revenues during the five year measurement period.

2. Expenditures:

No measurable effects.

3. Revenues:

No measurable effects.

III. FISCAL IMPACT ON LOCAL GOVERNMENT ENTITIES [Completed by LLA]

This section of the actuarial note pertains to annual fiscal costs (savings) relating to administrative expenditures and revenue impacts incurred by local government entities other than those included in Tables A and B. See Table C.

Estimated Fiscal Impact - Local Government Entities (other than the impact included in Tables A and B)
(Prepared by Local Government Services, Louisiana Legislative Auditor)

1. Narrative

From time to time, legislation is proposed that has an indirect effect on administrative expenditures and revenues associated with local government entities (other than the impact included in Tables A and B). Table C shows the estimated fiscal administrative cost impact of the proposed legislation on such local government entities. A fiscal cost is denoted by “Increase” or a positive number. Fiscal savings are denoted by “Decrease” or a negative number. A revenue increase is denoted by “Increase” or a positive number. A revenue decrease is denoted by “Decrease” or a negative number.

**2021 REGULAR SESSION
ACTUARIAL NOTE SB 13**

Fiscal Costs for Local Government Entities: Table C

EXPENDITURES	2021-22	2022-23	2023-24	2024-25	2025-26	5 Year Total
State General Fund	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
Agy Self Generated	0	0	0	0	0	0
Stat Deds/Other	0	0	0	0	0	0
Federal Funds	0	0	0	0	0	0
Local Funds	0	0	0	0	0	0
Annual Total	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0

REVENUES	2021-22	2022-23	2023-24	2024-25	2025-26	5 Year Total
State General Fund	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
Agy Self Generated	0	0	0	0	0	0
Stat Deds/Other	0	0	0	0	0	0
Federal Funds	0	0	0	0	0	0
Local Funds	0	0	0	0	0	0
Annual Total	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0

The proposed legislation will have the following effects on fiscal administrative costs and revenues related to local government entities during the five year measurement period.

2. Expenditures:

N/A – This bill only impacts state government, and therefore, has no local government impact. The Local Government Services section of the LLA does not review state government bills.

3. Revenues:

N/A – This bill only impacts state government, and therefore, has no local government impact. The Local Government Services section of the LLA does not review state government bills.

IV. FISCAL IMPACT ON STATE GOVERNMENT ENTITIES [Completed by LFO]

This section of the actuarial note pertains to annual fiscal cost (savings) relating to administrative expenditures and revenue impacts incurred by state government entities other than those included in Tables A and B. See Table D.

Estimated Fiscal Impact – State Government Entities (other than the impact included in Tables A and B)
(Prepared by Chris Keaton, Legislative Fiscal Officer)

1. Narrative

From time to time, legislation is proposed that has an indirect effect on administrative expenditures and revenues associated with state government entities (other than the impact included in Tables A and B). Table D shows the estimated fiscal administrative cost impact of the proposed legislation on such state government entities. A fiscal cost is denoted by “Increase” or a positive number. Fiscal savings are denoted by “Decrease” or a negative number. A revenue increase is denoted by “Increase” or a positive number. A revenue decrease is denoted by “Decrease” or a negative number.

Fiscal Costs for State Government Entities: Table D

EXPENDITURES	2021-22	2022-23	2023-24	2024-25	2025-26	5 Year Total
State General Fund	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
Agy Self Generated	0	0	0	0	0	0
Stat Deds/Other	0	0	0	0	0	0
Federal Funds	0	0	0	0	0	0
Local Funds	0	0	0	0	0	0
Annual Total	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0

REVENUES	2021-22	2022-23	2023-24	2024-25	2025-26	5 Year Total
State General Fund	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0
Agy Self Generated	0	0	0	0	0	0
Stat Deds/Other	0	0	0	0	0	0
Federal Funds	0	0	0	0	0	0
Local Funds	0	0	0	0	0	0
Annual Total	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0

The proposed legislation will have the following effects on fiscal costs and revenues related to state government entities during the five year measurement period.

**2021 REGULAR SESSION
ACTUARIAL NOTE SB 13**

2. Expenditures:

Other than the impact on employer contribution rates which is already reflected in Table A above, there is no anticipated direct material effect on governmental expenditures as a result of this measure.

3. Revenues:

There is no anticipated direct material effect on governmental revenues as a result of this measure.

Credentials of the Signatory Staff:

James J. Rizzo and Piotr Krekora, on behalf of Gabriel, Roeder, Smith & Company, serve as the Actuary for the Louisiana Legislative Auditor. They are Enrolled Actuaries, members of the American Academy of Actuaries, Associates of the Society of Actuaries and have met the Qualification Standards of the American Academy of Actuaries necessary to render the actuarial opinion contained herein.

Actuarial Disclosure: Risks Associated with Measuring Costs

This Actuarial Note is an actuarial communication, and is required to include certain disclosures in compliance with Actuarial Standards of Practice (ASOP) No. 51.

A full actuarial determination of the retirement system's costs, actuarially determined contributions and accrued liability require the use of assumptions regarding future economic and demographic events. The assumptions used to determine the retirement system's contribution requirement and accrued liability are summarized in the system's most recent Actuarial Valuation Report accepted by the respective retirement board and by the Public Retirement Systems' Actuarial Committee (PRSAC).

The actual emerging future experience, such as a retirement fund's future investment returns, may differ from the assumptions. To the extent that emerging future experience differs from the assumptions, the resulting shortfalls (or gains) must be recognized in future years by future taxpayers. Future actuarial measurements may also differ significantly from the current measurements due to other factors: changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period; or additional cost or contribution requirements based on the system's funded status); and changes in plan provisions or applicable law.

Examples of risk that may reasonably be anticipated to significantly affect the plan's future financial condition include:

1. Investment risk – actual investment returns may differ from the expected returns (assumptions);
2. Contribution risk – actual contributions may differ from expected future contributions. For example, actual contributions may not be made in accordance with the plan's funding policy or material changes may occur in the anticipated number of covered employees, covered payroll, or other relevant contribution base;
3. Salary and Payroll risk – actual salaries and total payroll may differ from expected, resulting in actual future accrued liability and contributions differing from expected;
4. Longevity and life expectancy risk – members may live longer or shorter than expected and receive pensions for a period of time other than assumed;
5. Other demographic risks – members may terminate, retire or become disabled at times or with benefits other than assumed, resulting in actual future accrued liability and contributions differing from expected.

The scope of an Actuarial Note prepared for the Louisiana Legislature does not include an analysis of the potential range of such future measurements or a quantitative measurement of the future risks of not achieving the assumptions. In certain circumstances, detailed or quantitative assessments of one or more of these risks as well as various plan maturity measures and historical actuarial measurements may be requested from the actuary. Additional risk assessments are generally outside the scope of an Actuarial Note. Additional assessments may include stress tests, scenario tests, sensitivity tests, stochastic modeling, and a comparison of the present value of accrued benefits at low-risk discount rates with the actuarial accrued liability.

However, the general cost-effects of emerging experience deviating from assumptions can be known. For example, the investment return since the most recent actuarial valuation may be less (or more) than the assumed rate, or a cost-of-living adjustment may be more (or less) than the assumed rate, or life expectancy may be improving (or worsening) compared to what is assumed. In each of these situations, the cost of the plan can be expected to increase (or decrease).

The use of reasonable assumptions and the timely receipt of the actuarially determined contributions are critical to support the financial health of the plan. However, employer contributions made at the actuarially determined rate do not necessarily guarantee benefit security.

**2021 REGULAR SESSION
ACTUARIAL NOTE SB 13**

Information Pertaining to Article (10)(29)(F) of the Louisiana Constitution

SB 13 contains a retirement system benefit provision having an actuarial cost.

Some members of the Louisiana State Police Retirement System could receive a larger benefit with the enactment of SB 13 than what they would have received without SB 13.

Dual Referral Relative to Total Fiscal Costs or Total Cash Flows:

The information presented below is based on information contained in Tables A, B, C, and D for the first three years following the 2021 regular session.

<u>Senate</u>		<u>House</u>	
<input type="checkbox"/>	13.5.1 Applies to Senate or House Instruments. If an annual fiscal cost \geq \$100,000, then bill is dual referred to: Dual Referral: Senate Finance	<input type="checkbox"/>	6.8F Applies to Senate or House Instruments.
