Provides relative to the capital outlay process and reporting requirements

Proposed law adds application and reporting requirements for capital outlay projects, requires projects funded through the issuance of debt to be included in the Capital Outlay Act, eliminates the needs-based exemption from the local match requirement for non-state entity projects, and enacts new requirements regarding timely submission of invoices by designers and contractors. It further provides that the Capital Outlay Savings Fund shall be comprised of both recurring and nonrecurring state general fund revenues. Proposed law requires any entity administering a capital outlay project to require all parties to submit invoices within 120 days of the date services are rendered or performed, and that failure of a party to timely submit an invoice for services rendered or performed shall result in the party's claim for reimbursement or payment from the state being denied.

**EXPENDITURE EXPLANATION**

There is no anticipated direct material effect on governmental expenditures as a result of this measure. This bill eliminates the needs-based exception from the 25% local match requirement for certain local capital outlay projects. However, the DOA indicates that they do not currently use this specific needs-based exception given that it has not been promulgated in administrative rule. Therefore, removing this exception has no impact on current practice.

**REVENUE EXPLANATION**

There is no anticipated direct material effect on governmental revenues as a result of this measure.
