EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure.

REVENUE EXPLANATION

Proposed law will have an indeterminable impact on revenues collected by the Louisiana Department of Natural Resources (DNR). Proposed law exempts solar power generation facilities that have a power purchase agreement in place from application and annual monitoring and maintenance fees collected by DNR. Act 555 of the 2022 Regular Legislative Session granted DNR the power to establish fees to administer the solar power program. The department indicates it is currently writing rules that would create the most revenue neutral fund structure. Under proposed law, the department would likely need to modify the fee structure to account for any exempt facilities. Until the department completes the rule promulgation process, the impact of exempting certain facilities from needing a permit to operate a solar power facility is unknown.
