Dept./Agy.: Department of Transportation and Development		Analyst: Kimberly Fruge
Subject: Annual Estimates Derived from Aviation Fuel Collections		

MULTIMODAL COMMERCE EN SEE FISC NOTE SD EX Page 1 of 1
 Provides relative to annual aviation fuel estimates. (8/1/26)

Current law requires the Department of Revenue to annually estimate the revenue derived from state taxes collected from aviation fuel purchases. The average price per gallon of aviation fuel is based on historical data, current market fuel prices, and trends. The volume of aviation fuel is based on data provided by the Energy Information Administration or the Bureau of Transportation Statistics. The sales tax rate is based on the current state sales tax rate in effect at the time of the estimate. The estimated revenues are submitted to the Revenue Estimating Conference within five calendar days of the annual estimate being completed by the Secretary of the Department of Revenue. Current law sunsets January 1, 2027. Proposed law requires the Department of Transportation and Development (DOTD) to promulgate rules and procedures for the average price per gallon of aviation fuel and the volume of aviation fuel sold in Louisiana to estimate the revenue derived from state taxes collected from aviation fuel purchases. Proposed law requires the Department of Revenue to provide a report to DOTD of the actual state tax collections derived from sales of aviation fuels. Proposed law requires the Revenue Estimating Conference to utilize the estimation formula and rules promulgated by DOTD to develop its annual estimate of aviation fuel taxes collected.

EXPENDITURES	2026-27	2027-28	2028-29	2029-30	2030-31	5 -YEAR TOTAL
State Gen. Fd.	\$0	\$0	\$0	\$0	\$0	\$0

Local Funds	\$0	\$0	\$0	\$0	\$0	\$0

Annual Total

EXPENDITURE EXPLANATION

Proposed law changes the procedure to estimate the revenue to be derived from state taxes collected from the purchase of aviation fuels. To the extent the Revenue Estimating Conference (REC) estimate of aviation fuel tax collections changes as a result of proposed law, the appropriation to the Aviation Account of the Transportation Trust Fund may increase or decrease accordingly, with an equal but inverse impact on the SGF.

The Department of Revenue reports a one-time expense of approximately \$13,100 for IT system design, specification, development, and testing to provide a report to DOTD of the actual state tax collections derived from sales of aviation fuels. The department will absorb these costs within its existing operating budget.

For informational purposes, historically, deposits into the Aviation Account of the Transportation Trust Fund were forecast at a standard, recurring \$29.8 M by agreement of various interests. In FY 24, the REC began forecasting revenues for deposit into the account using available data from returns and economic indicators and recognized \$20.5 M. In FY 25, the Department of Revenue, in collaboration with the Department of Transportation and Development, was required to annually estimate the revenue to be derived from state taxes collected from purchases of aviation fuels and submit the estimate to the REC. REC recognized \$20.8 M in FY 25 and \$20.2 M in FY 26. Proposed law requires the Department of Transportation and Development to promulgate rules and procedures to estimate the revenue derived from state taxes collected from aviation fuel purchases and requires the REC to utilize the estimation formula to develop its annual estimate.

REVENUE EXPLANATION

To the extent the Revenue Estimating Conference (REC) estimate of aviation fuel tax collections changes as a result of the proposed law, the dedication to the Aviation Account of the Transportation Trust Fund may increase or decrease accordingly, with an equal but inverse impact on the SGF.

Senate
 13.5.1 >= \$100,000 Annual Fiscal Cost {S & H}
 13.5.2 >= \$500,000 Annual Tax or Fee Change {S & H}

House
 6.8(F)(1) >= \$100,000 SGF Fiscal Cost {H & S}
 6.8(G) >= \$500,000 Tax or Fee Increase or a Net Fee Decrease {S}
