SB No. 312

Present law provides that the intent of the water fluoridation program shall be to encourage each public water system with at least 5,000 service connections to provide fluoridation of its water supply by January 1, 2000.

Proposed law provides that each public water system that has at least 5,000 service connections and natural levels of fluoride that are outside the optimal range established in the rules and regulations adopted pursuant to present law shall acquire, install, operate and maintain appropriate equipment and material in order to maintain the level of fluoride in its water system in the optimal range for the purpose of protecting the dental health of citizens of this state, as established in the rules and regulations adopted pursuant to present law.

Proposed law provides that such public water system shall provide to the department no later than March 1, 2009, an estimate of the total capital costs to acquire and install fluoridation treatment equipment capable of maintaining fluoride levels within the optimal range for the purpose of protecting the dental health of citizens of this state, as established in the rules and regulations adopted pursuant to present law.

Proposed law provides that no public water system shall be required to comply with proposed law unless sufficient funds have been identified by the state, whether by appropriation, capital outlay, grants or similar means or source of funds, as available to that system for the cost of acquiring and installing fluoridation equipment and the cost of material required to fluoridate said system for at least six months from the date of initial installation.

Proposed law further provides that a public water system that has never used fluoridation to adjust fluoride levels in its water and whose water contains fluoride in amounts outside the range established in the rules and regulations adopted pursuant to present law as optimal for the purpose of protecting the dental health of the citizenry shall be exempt from compliance with proposed law provided all of the following apply:

- (1) A petition requesting the exemption has been signed by at least fifteen percent of the registered voters in all municipalities served by said water system, as certified by the parish registrar of voters, and has been presented to the governing body of each municipality in whose jurisdiction the system provides service.
- (2) Each municipal government in whose jurisdiction the water system provides service, after receiving the petition and certification from the parish registrar of voters, has called for a local election on the exemption.
- (3) Each local election pertaining to the exemption of said water system has been held in accordance with state and local law, and the certified results of each election show that a majority of the registered voters who cast a vote in said election approve the exemption.
- (4) No election on the same question in the same municipality took place in the four years immediately prior to the election in which the exemption was approved.

Proposed law authorizes the office of public health to promulgate regulations in accordance with the APA related to maintaining levels of fluoride in public water systems within the optimal range for the purpose of protecting the oral health of the citizens of the state.

Effective upon signature of the governor or lapse of time for gubernatorial action.

(Amends R.S. 40:5.11(B) and (G))

Summary of Amendments Adopted by Senate

Committee Amendments Proposed by Senate Committee on Health and Welfare to the original bill.

1. Changes from "up to" to "at least" six months from the date of initial installation in the provision that provides that no public water system shall be required to comply with proposed law unless sufficient funds have been identified by the state as available to that system for the cost of acquiring and installing fluoridation equipment and the cost of material required to fluoridate said system.

Summary of Amendments Adopted by Senate

Senate Floor Amendments to engrossed bill.

1. Specifically authorizes the office of public health to promulgate regulations in accordance with the APA related to minimum levels of fluoride in public water systems.

Summary of Amendments Adopted by House

Committee Amendments Proposed by House Committee on Health and Welfare to the reengrossed bill.

1. Changes reference in proposed law from minimum levels of fluoride to levels of fluoride that are within or outside the optimal range, as established in rules and regulations.
2. Stipulates that the petition requesting an exemption from compliance with proposed law must be signed by at least fifteen percent of the registered voters in all municipalities served by the water system, instead of thirty percent.
3. Makes technical changes.
