HEALTH/ACC INSURANCE EG +\$411,196 FF EX See Note  
Provides relative to health insurance rate review and approval. (See Act.)

Page 1 of 2

Present law provides for approval/disapproval of health and accident insurance forms and policies by the commissioner of insurance; provides rate limitations for health benefits plans for small employers and individuals; provides for rating factors; sets allowable percentages of annual increases; requires certain disclosures with regard to rates; provides for maintenance of records; allows insurers to create and maintain separate risk pools; and provides for prohibition of unfair discrimination. Proposed law establishes a fee for new rate filings and changes; increases the time for the use of forms from 45 days to 60 days after filing; makes rate review and approval requirements applicable to large group health plans; provides for commissioner review of rates; provides certain rating restrictions effective 1/1/14; prohibits use of health status in rate setting; requires opportunity for public comment; prohibits separate risk pools; provides for penalties, revocation and suspension; provides for judicial review; provides for length of health plans and disallows rate changes during the plan period; and requires actuarial certification. Effective 1/1/14.

**EXPENDITURE EXPLANATION**

The proposed law will result in an increase in expenditures by the Louisiana Department of Insurance (LDI) estimated at approximately \$411,196, and require 2 additional T.O. in FY 14. Under the proposed law, a health insurance issuer shall be required to file information related to any proposed increase in base premium to the commissioner of insurance for evaluation and approval. Filings shall be made no less than 105 days prior to the proposed effective date. The department shall publish on its website a public summary of such proposals within 15 days of submission and allow the public 30 days to submit comments after such publication. The department shall evaluate the rate increase, make an actuarial determination of reasonableness, and notify the health insurance issuer of approval or disapproval of the premium rate filing within 60 days of filing. The department shall also post final determinations on its website.

In 2011, there were 85 health insurance companies that reported premiums subject to an assessment as per the federal Health Insurance Portability and Accountability Act (HIPAA). Of these companies, premium changes impacted approximately 690 different health or major medical products. The requirements of the proposed law will cause an increase in workload for reviewing rate increases within LDI's Office of Health Insurance within the Market Compliance Program. LDI indicates it will

**CONTINUED ON PAGE 2**

**REVENUE EXPLANATION**

The proposed law would result in additional fees and self-generated revenues to the Louisiana Department of Insurance (LDI). The proposed law sets fees for new premium rate filings at \$100 and for premium rate changes at \$150. LDI is unable to anticipate the number of rate filings that would occur on an annual basis. In 2011, LDI had 290 filings on major medical products and HMO products. The department anticipates the number of rate reviews required under the proposed law to be substantially greater than 290 filings mentioned above. LDI estimates the additional SGR revenues to be generated under the proposed law to exceed \$29,000 annually. Proposed law also provides for specific penalties ranging from \$1,000 per violation up to \$25,000 for failure to comply with enumerated requirements. The LFO believes this could result in a periodic and potentially substantial increase in SGR revenues, but the total and frequency is indeterminable.

<b>Subject:</b> Provides relative to health insurance rate review	

**CONTINUED EXPLANATION from page one:**

require two additional positions, one Insurance Specialist III to process rate filings and one staff actuary to perform timely actuarial analyses of rate filings. Additionally, LDI will require a professional services contract for an actuarial consultant to evaluate rates based on actuarial principles and to assist LDI in the development and/or expansion of the rate review procedures and systems to comply with the requirements of the federal Patient Protection and Affordable Care Act (PPACA). LDI will require a \$50,000 information technology contract to redesign its website to facilitate public notice of rate reviews, allow for public feedback and to post final determination information.

LDI received a federal grant in FY 11 to fund or supplement this activity. The LDI has been made aware by the federal government that the state is eligible for a minimum \$1 million grant to fund the fiscal impact of the proposed legislation. However, in order to qualify for these federal funds, the state is required to have an effective rate review process in place. To the extent this bill is enacted and the LDI receives at least \$1 million in grant funds, these federal grant funds will cover the anticipated expenditures for FY 14 and FY 15. Subsequent fiscal year expenditures will likely be funded with SGR.
