

Regular Session, 2014

HOUSE RESOLUTION NO. 1

BY REPRESENTATIVE MORENO

CRIMINAL/SENTENCING: Directs the legislative auditor to evaluate the use of solitary confinement in La.

1 A RESOLUTION

2 To direct the legislative auditor, through the Louisiana Performance Audit Program, to  
3 evaluate the use of solitary confinement, isolation, closed-cell restriction, and  
4 extended lockdown by the Department of Public Safety and Corrections and its  
5 effectiveness and impact on housing costs, prison violence, inmate safety,  
6 recidivism, and the mental health of the inmate placed in such conditions.

7 WHEREAS, solitary confinement requires substantial isolation of the inmate from  
8 other inmates, and while in solitary confinement, an inmate's movements and privileges are  
9 more restricted compared to inmates in the general population, including segregation that  
10 may be for twenty-three hours a day or more in which the inmate is given limited or no  
11 opportunities for social contact with other persons; and

12 WHEREAS, in 2012, the American Bar Association advised that isolated  
13 confinement should be "imposed in the most limited manner possible" and further advocated  
14 for an "investigation as to how the use of long-term solitary confinement may be restricted  
15 so as to promote the safe, efficient, and humane operation of prisons"; and

16 WHEREAS, recent studies have been issued regarding the impact of long-term  
17 isolation on the mental health and functioning of an inmate with some studies finding that  
18 isolation can be psychologically harmful to any prisoner, with the nature and severity of the  
19 impact depending upon the individual, the duration of the isolation, and the particular  
20 conditions of the confinement; and

1           WHEREAS, as a result of these findings, a number of states, including Maine,  
2 Mississippi, Texas, Illinois, and Washington, are looking to reduce their use of solitary  
3 confinement and are searching for alternative strategies and best practices.

4           THEREFORE, BE IT RESOLVED that the House of Representatives of the  
5 Legislature of Louisiana does hereby direct the legislative auditor, through the Louisiana  
6 Performance Audit Program, to evaluate the use of solitary confinement, isolation, closed-  
7 cell restriction, and extended lockdown by the Department of Public Safety and Corrections  
8 and its effectiveness and impact on housing costs, prison violence, inmate safety, recidivism,  
9 and the mental health of the inmate placed in such conditions.

10           BE IT FURTHER RESOLVED that the legislative auditor shall evaluate and report  
11 its findings to the Department of Public Safety and Corrections and the House Committee  
12 on the Administration of Criminal Justice no later than January 1, 2016.

13           BE IT FURTHER RESOLVED that the evaluation and report issued by the  
14 legislative auditor shall include but not be limited to information on the following:

15           (1) Classification levels of inmates ordered to the custody of the Department of  
16 Public Safety and Corrections.

17           (2) Conditions and privileges associated with each classification including but not  
18 limited to information on yard time, visitation, access to books and other reading materials,  
19 access to television and radio, and access to phones.

20           (3) The number of inmates within each classification at each facility.

21           (4) A description of each type of solitary confinement, isolation, closed-cell  
22 restriction, and extended lockdown used at each facility.

23           (5) The number of placements in solitary confinement, isolation, closed-cell  
24 restriction, and extended lockdown, and the duration of each placement.

25           (6) The conditions associated with solitary confinement, isolation, closed-cell  
26 restriction, and extended lockdown.

27           (7) Rules and guidelines regulating the use of solitary confinement, isolation, closed-  
28 cell restriction, and extended lockdown, including but not limited to information on  
29 procedures for release from such placement.

1 (8) Percentage of recidivism within the facility of inmates returning to solitary  
2 confinement, isolation, closed-cell restriction, and extended lockdown.

3 (9) Recidivism rate of inmates who have been placed in solitary confinement,  
4 isolation, closed-cell restriction, or extended lockdown prior to their release.

5 (10) Cost associated with placement of an inmate in solitary confinement, isolation,  
6 closed-cell restriction, or extended lockdown versus the cost associated with placement in  
7 the general population.

8 (11) The number of inmates with a mental health condition or illness prior to being  
9 placed in solitary confinement, isolation, closed-cell restriction, or extended lockdown.

10 (12) The number of inmates who develop mental health conditions or illnesses while  
11 placed in solitary confinement, isolation, closed-cell restriction, or extended lockdown.

12 (13) The number of suicides and attempted suicides committed by persons placed  
13 in solitary confinement, isolation, closed-cell restriction, and extended lockdown.
