**EXPENDITURE EXPLANATION**

There is no anticipated direct material effect on governmental expenditures as a result of this measure. The DOE currently administers a valid and reliable national survey that collects data on health-risk behaviors among school aged children. DOE indicates the survey instrument could be revised to incorporate questions on other chronic health conditions, including those related to sexual health. The DOE and local educational authorities (LEA) have access to a web-based survey system that could be used to collect the data at no cost to the LEAs or the state.

**REVENUE EXPLANATION**

There is no anticipated direct material effect on governmental revenues as a result of this measure.
