HB No. 754

Abstract: Authorizes first responders to carry naloxone and administer it to a third party who is undergoing an opioid-related drug overdose.

Proposed law defines "first responder" as any of the following:

- (1) Any full-time employee of the state, a municipality, a sheriff, or other public agency, whose permanent duties actually include the making of arrests, the performing of searches and seizures, or the execution of criminal warrants, and is responsible for the prevention or detection of crime or for the enforcement of the penal, traffic, or highway laws of this state, but not including any elected or appointed head of a law enforcement department.
- (2) A firefighter regularly employed by a fire department of any municipality, parish, or fire protection district of the state of Louisiana, or any volunteer fireman of the state of Louisiana.
- (3) Emergency medical personnel licensed pursuant to the laws of this state.

Proposed law defines "opioid-related drug overdose" as a condition including extreme physical illness, decreased level of consciousness, respiratory depression, coma, or the ceasing of respiratory or circulatory function resulting from the consumption or use of an opioid, or another substance with which an opioid was combined.

Proposed law authorizes a first responder to receive a prescription for naloxone or another opioid antagonist, maintain the naloxone or other opioid antagonist in the first responder's possession, and administer the naloxone or another opioid antagonist to any individual who is undergoing or who is believed to be undergoing an opioid-related drug overdose.

Proposed law requires the first responder to keep a record of each instance in which the first responder administers naloxone or another opioid antagonist to an individual who is undergoing or who is believed to be undergoing an opioid-related drug overdose.

Proposed law authorizes a law enforcement agency or fire department to enter into a written agreement to affiliate with an ambulance service provider or a physician for all of the following purposes:

- (1) Obtaining a supply of naloxone or another opioid antagonist.
- (2) Allowing law enforcement officers and firefighters to obtain the training necessary to safely and properly administer naloxone or another opioid antagonist to individuals who are undergoing or who are believed to be undergoing an opioid-related drug overdose.

Proposed law provides immunity from civil liability, criminal prosecution, or disciplinary or other adverse action under any professional licensing statute to a first responder who, reasonably believing another person to be undergoing an opioid-related drug overdose, administers naloxone or another opioid antagonist to that person for any outcomes resulting from the administration of the naloxone or another opioid antagonist to that person, unless personal injury results from the gross negligence or willful or wanton misconduct of the first responder administering the drug.
