

HOUSE SUMMARY OF SENATE AMENDMENTS

HB 256

2015 Regular Session

Pope

SCHOOLS/BOARDS: Provides relative to certain interlocal risk management agencies

Synopsis of Senate Amendments

1. Technical amendments only.

Digest of Bill as Finally Passed by Senate

Present law authorizes multiple local governmental subdivisions to form an "interlocal risk management agency" to develop and administer risk management programs to insure and defend against certain legal claims and to establish group self-insurance funds to self-insure or purchase joint insurance policies for accident and health protection or to insure against public liability or worker's compensation risks. Proposed law retains present law and also authorizes city, parish, or local public school systems to form and participate in interlocal risk management agencies.

Present law authorizes municipalities to designate the La. Municipal Assoc. and parishes to designate the Police Jury Assoc. of La. to administer the risk management agency and any group self-insurance fund and, if so designated, the boards of these associations serve as trustees of each interlocal risk management agency. Proposed law also authorizes school boards, by adoption of a resolution, to so designate the La. School Board Assoc. as an administrator and its board of directors will serve as a board of trustees.

Present law specifically authorizes the La. Municipal Assoc. and the Police Jury Assoc. of La. to become members of an interlocal risk management agency in order to provide accident and health protection to its own employees, insure against public liability and worker's compensation, and to provide coverage for motor vehicle liability, burglary and forgery, and fire loss. Proposed law authorizes the La. School Board Assoc. to also become a member beneficiary of such agency.

Proposed law provides technical corrections to cross-references of various laws.

(Amends R.S. 33:1342(1), 1343(B) and (F), and 1344)
