SB 241 Engrossed

DIGEST
2018 Regular Session

Morrell

Present law provides for licensure of pharmacy benefit managers by the commissioner of insurance. Proposed law prohibits pharmacy benefit managers licensed in Louisiana from imposing "gag orders" by contract on pharmacies or pharmacists which prevent them from informing the patient of cheaper alternatives when filling their prescription drug. Proposed law prohibits such provisions in contracts and retroactively makes null and void any such provisions in place on August 1, 2018.

Proposed law authorizes pharmacists to inform patients that a cheaper alternative may be available, including cash payment if a cash payment is cheaper than the patient's insurance copayment or deductible amount. Proposed law provides immunity for a pharmacist who does not provide the information to a patient.

Effective August 1, 2018.

(Amends R.S. 22:1657; adds R.S. 37:1219)
