Reduces frequency of enhanced audits required of certain local auditees with at least three consecutive years of enhanced audits with no findings. (8/1/18)

Purpose of Bill: Provides that after three consecutive years of no exceptions resulting from the submission of additional information (as part of annual audits), those qualifying entities will only have to comply with the provisions of R.S. 24:513(J) (1)(c)(v)(aa) every three years rather than annually.

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on overall local governmental expenditures as a result of this measure.

R.S. 24:513(J)(1)(c)(v)(aa) provides for enhanced additional oversight by the Louisiana Legislative Auditor (LLA), who prescribes certain procedures that are performed in addition to each local entity's (those with revenues > \$75K) annual reporting requirements in St. Tammany Parish. These additional procedures are annually developed by the LLA and are assigned to local entities using a risk-based approach. That is, the procedures prescribed for each local entity can and do change each year based on the current risk assessment. It is expected that the total cost of this oversight will naturally decrease as recommendations for improvements in internal controls, policies and practices are implemented by the local entities. Also, we have assumed for purposes of this note that "findings" refers specifically to those exceptions that are identified during the performance of the additional assigned procedures.

SB 360 is not expected to have a net fiscal impact on either local entity revenues or expenditures in the aggregate because the cost savings of reductions in procedures prescribed for any one entity may likely be offset by the increased costs of additional procedures assigned to other entities depending on their current risk assessments.

REVENUE EXPLANATION

There is no anticipated direct material effect on governmental revenues as a result of this measure.
