EXPENDITURE EXPLANATION

There may be an expenditure increase from the statutorily dedicated LA Cybersecurity Talent Initiative Fund for postsecondary institutions to the extent that the fund receives an appropriation and the matching requirements are satisfied; and an expenditure increase (presumed to be SGF) for the BOR related to reimbursement of actual expenses for members of the Cybersecurity Education Management Council should funding become available. There will also be a workload increase for the Board of Regents (BOR) to provide staff and support to the Cybersecurity Education Management Council which will be absorbed utilizing existing staff and resources.

Additionally, creating a new statutory dedication (LA Cybersecurity Talent Initiative Fund) within the state treasury will result in a marginal additional workload for the Treasury, which can generally be absorbed with existing resources. However, to the extent other legislative instruments create new statutory dedications, there may be material additional costs associated with the aggregate effort to administer these funds. The Treasury performs fund accounting, financial reporting, banking and custodial functions for 399 special funds. When unable to absorb additional workload with existing resources, the treasury anticipates a personal services expenditure increase of approximately \$71,000 for 1 T.O. position plus approximately \$2,500 for a one-time purchase of office equipment. These expenditures are assumed to be SGF.

REVENUE EXPLANATION

There will be a reduction in state general fund to the extent the legislature transfers funds from the state general fund to the LA Cybersecurity Talent Initiative Fund.
