Further provides that such districts shall have boundaries coterminous with the school district.

Proposed law retains present law and creates educational facilities improvement districts in school districts in parishes with populations in the following ranges:

2. Between 33,000 and 33,500 persons.

Present law provides that such districts are created for purposes of assisting school boards to purchase, construct, or improve school buildings and other school-related facilities; acquire necessary or desirable equipment and furnishings therefor; repair, maintain, and rehabilitate existing school-related facilities; acquire or improve lands for building sites, playgrounds, and other school-related areas, title to which shall be vested in the public, and to maintain such facilities; to provide funding for other matters for which school boards are authorized by law to expend funds; and generally to assist school boards experiencing financial difficulties regarding capital facilities or other needs.

Present law provides for governance of such districts by a board of at least 5 directors (the number to be determined by the respective school board) and provides for the terms, selection of officers, domicile, and a place or places for meetings. Provides that directors shall serve without compensation but may receive reimbursement of expenses at a rate not to exceed the rate for state employees.
