STUDENTS RE DECREASE GF RV See Note Page 1 of 2  
Provides relative to disbursement of funds from START savings accounts. (8/1/20)

The **Student Tuition Assistance and Revenue Trust (START) Program** established in 1995 allows for deposits into savings accounts established to pay for certain expenses associated with enrollment in an institution of higher education. Taxpayers are allowed to deduct deposits up to \$2,400 for single and \$4,800 for joint filers from state taxable income. The state provides an enhanced earning contribution between 2% and 14% depending upon the adjusted gross income of the taxpayer contributing to the account. The **Student Tuition Assistance and Revenue Trust Kindergarten through Grade 12 (START K12) Program** was established in 2018 to provide for expenses of enrollment in grades K-12. There are no state tax deductions on deposits into these accounts, nor are there enhanced earnings contributions to these accounts made by the state.

Proposed law allows for a one time \$10,000 withdrawal from the **START** account for enrollment expenses of students in grades K-12. Effective August 1, 2020

**EXPENDITURE EXPLANATION**

The Office of Student Financial Assistance (OSFA) estimates increased costs of approximately \$6,000 to program their computer system to accommodate these withdrawals from existing accounts. There will be an increase in SGF need to meet the enhanced earnings contribution on new START accounts established to take advantage of the \$10,000 annual withdrawal for K-12 tuition costs. The contribution rate ranges from 2% to 14% depending upon the income of the individual making the deposit so any increase is indeterminable at this time. The total estimated state contribution for enhanced earnings for FY 20 is approximately \$3 M for approximately 69,450 accounts. The increase will depend upon the number of new accounts and the amount of deposits into those accounts. New accounts may be established between June 1 and December 31 for taxpayers to avail themselves of potential tax benefits.

**REVENUE EXPLANATION**

There will be a reduction in revenue collections of the state as a result of tax filers' ability to annually withdraw funds from the START account for expenses that are otherwise prohibited and would otherwise be paid from the START K-12 account, as these expenses are eligible for certain tax deductions. Potential reductions are indeterminable at this time.

**LA.R.S. 17:3095** allows for maximum state tax deductions of \$2,400 (single filer) or \$4,800 (joint filer) for contributions made to START accounts. **LA. R.S. 47:297.10** allows for a maximum state tax deduction of \$5,000 **per child** for nonpublic school and public lab school tuition expenses. The Department of Revenue reported a total of 75,200 returns claiming these deductions in 2018. Of these, 4,407 returns filed for contributions to START accounts and also claimed the \$5,000 tax deduction for tuition payments. This bill would have no impact on these filers.

For the same time frame, 10,275 filers contributed to START accounts but did not claim the \$5,000 tax deduction for tuition expenses. These filers could potentially exercise the authority in the proposed legislation to withdraw up to \$10,000 per year for K-12 tuition expenses. This would also make these filers eligible for the \$5,000 tax deduction authorized under 47:297.10. In 2018, approximately 570 account holders took advantage of the one time withdrawal authority and were eligible for the \$5,000 tax deduction.

**CONTINUED EXPLANATION from page one:**

Page 2 of 2

**Revenue Explanation Continued from page one**

An additional 60,518 filers currently claim the \$5,000 tax deduction for tuition expenses, but do not have a START account. The proposed legislation could provide an incentive for these filers to establish a START account and use up to \$10,000 of these funds for K-12 tuition. These filers would be able to claim the \$4,800 deduction authorized under 17:3095. These accounts would also be eligible for the 2%-14% earnings enhancement contribution funded with state general fund. While the proposed legislation prohibits the withdrawal of these enhanced earnings for K-12 tuition, the accounts would still be eligible for the state contribution which would continue to accrue to the fund.

In order to illustrate potential impact, the LFO calculated potential reductions in state revenue collections based on the assumption that 600 existing START account holders would avail themselves of the \$5,000 deduction in 47:297.10. While it is likely there will be an increase in the number of individuals that would create a new START account and avail themselves of the additional \$4,800 tax benefit in 17:3095 through December 31, 2020, the LFO cannot estimate how many that would be. As such, the revenue impact below is likely underestimated. Furthermore, the impact would vary depending upon the tax rate paid by those filers. These numbers are illustrative only and are subject to normal fluctuations in the number of claimants for each tax deduction. **Note that these represent deductions for only one dependent, although a significant portion of current filers claim multiple dependents.**

<u>Potential Exposure of 600 possible filers</u>	<u># Filers</u>	<u>Potential Deductions</u>
Claims \$4,800 START deduction AND \$5,000 tuition deduction	600	\$3,000,000
Potential SGF Revenue Loss by tax rate	2%	(\$60,000)
	4%	(\$120,000)
	6%	(\$180,000)
