**EXPENDITURE EXPLANATION**

Proposed law will result in an indeterminable but significant increase in SGF expenditures to the Department of Public Safety and Corrections - Corrections Services (DPSC - CS) if a person is convicted of "possession of firearm or carrying concealed weapon by a person convicted of certain felonies" as defined in LA R.S. 14:95.1. Proposed law designates this offense as a crime of violence under LA R.S. 14:2. Present law details the ability of individuals to earn diminution and commutation of sentence for good behavior in certain circumstances as defined in LA R.S. 15:571.3. Designating a violation of LA R.S. 14:95.1 as a crime of violence would require a person to serve a minimum of 75% of his/her sentence rather than a minimum of 35%.

Over the last three years, DPSC-CS reports an average of 155 people taken into state custody whose sole criminal conviction was attributable to violation of LA R.S. 14:95.1. The average captures the number of intakes over the past three calendar years. The potential expenditure exposure to the state will be determined by a number of factors, including the number of individuals convicted of possession of firearm or carrying concealed weapon by a person convicted of certain felonies, the average sentence length given to convicted individuals, and the successful earning of diminution and commutation of sentence for good behavior. These factors are unknown, but for illustrative purposes regarding the potential expenditure exposure DPSC-CS offered the illustrative example on page 2. The example projects potential costs based upon the following assumptions:

- 1) 155 convictions resulting in admission to state custody annually.
- 2) Offenders are given an average sentence of 6.3 years, or 2,300 days (the maximum is twenty years).
- 3) The offenders are convicted solely for violation of LA R.S. 14:95.1.
- 4) Offenders would earn diminution of sentence for good behavior and be released after 35% of sentence under present law.
- 5) Offenders will earn diminution of sentence for good behavior and be released after 75% of sentence under proposed law.

**Potential Expenditure Exposure (for illustrative purposes)**

ASSUMED SENTENCE LENGTH IN DAYS	35% OF SENTENCE IN DAYS	75% OF SENTENCE IN DAYS	INCREASE IN DAYS
2,300	805	1,725	920

**EXPENDITURE EXPLANATION CONTINUED ON PAGE TWO**

**REVENUE EXPLANATION**

There is no anticipated direct material effect on governmental revenues as a result of this measure.

Senate Dual Referral Rules  
 13.5.1 >= \$100,000 Annual Fiscal Cost {S & H}  
 13.5.2 >= \$500,000 Annual Tax or Fee Change {S & H}

House  
 6.8(F)(1) >= \$100,000 SGF Fiscal Cost {H & S}  
 6.8(G) >= \$500,000 Tax or Fee Increase or a Net Fee Decrease {S}

LEGISLATIVE FISCAL OFFICE
Fiscal Note

Fiscal Note On: SB 188 SLS 20RS 156
Bill Text Version: ENGROSSED
Opp. Chamb. Action:
Proposed Amd.:
Sub. Bill For.: REVISED

Date: May 14, 2020 11:34 AM Author: WHITE, B
Dept./Agy.: Statewide Analyst: Monique Appeaning
Subject: Possession of a firearm by a felon as a "crime of violence"

CONTINUED EXPLANATION from page one:

EXPENDITURE EXPLANATION CONTINUED FROM PAGE ONE

If released at 35% of sentence, an individual with a 6.3 year sentence would serve 805 days, which creates an expenditure exposure compared to present law beginning in FY 23. If released at 75% of sentence, an individual with a 6.3 year sentence would serve 1,725 days, or an increase of 920 days above the 35% diminution. The total expenditure exposure increases annually through FY 25 as detailed in the tabulations below. The change from release eligibility at 35% of sentence to 75% of sentence would result in 290 additional incarceration days per offender in the third year of incarceration (365 days per year x 3 years - 805 days at release after 35% of sentence), 365 additional incarceration days per offender in the fourth year, and 265 additional incarceration days in the fifth year (920 total additional days - 290 days served in year three - 365 days served in year four).

Table with 4 columns: YEAR OF ADMIT, FY 23 (YEAR THREE) ADDED DAYS, FY 24 (YEAR FOUR) ADDED DAYS, FY 25 (YEAR FIVE) ADDED DAYS. Rows for years 2021-2024 and a TOTAL row.

TOTAL MAN DAYS = TOTAL ADDED DAYS BY YEAR X 155 ANNUAL ADMITS

Table with 4 columns: TOTAL MAN DAYS, FY 23, FY 24, FY 25. Values: 44,950, 101,525, 142,600.

The additional man days create a potential expenditure exposure of \$26.39 per day per offender to house an offender at the local level or \$67.44 per offender per day to house an offender at the state level.

Table with 4 columns: Expenditure rate, \*FY 23, \*FY 24, \*FY 25 and out-years. Rows for local and state level rates.

The estimates above are provided as an illustrative example only. Any change to the assumptions detailed on page one would cause variation in the potential costs. The total expenditure impact of proposed law is indeterminable, but will likely result in an unknown number of additional incarceration days for offenders serving in state custody for the relevant crime, which will in turn increase SGF expenditures by an indeterminable amount. The total impact is unknown and will vary based on the following factors at minimum:

- 1) If the number of admits increases or decreases, total costs would adjust accordingly.
2) If offenders are sentenced for a period longer than the average 6.3 years, the out-year expenditure exposure will increase significantly.
3) The number of offenders earning diminution of sentence at 35% under present law, or 75% under proposed law, is speculative.
\*4) R.S. 15:571.3 stipulates that the calculation for diminution of sentence includes time spent in custody with good behavior prior to sentencing.

Judiciary

Proposed law will have an indeterminable SGF expenditure impact on the Judiciary and they reported that there is not data available to determine the fiscal impact on expenditures.

Louisiana District Attorney Association (LDAA)

LDAA reports that proposed law would not in and of itself have a fiscal impact on the Office of the District Attorney. It is within the course and scope of prosecutorial duties to prosecute these cases.

Louisiana Public Defender Board (LPDB)

LPDB reports that proposed law would likely create an indeterminable workload impact for public defenders to provide effective representation to indigent clients. LPDB reports that possession of a firearm by a felon is one of the most common charges in its database, appearing in almost 4,000 cases in calendar year 2019. To the degree that increased potential incarceration days would result in changes in an offender's representation, LPDB feels its workload for these cases will increase accordingly.

Louisiana Sheriffs Association (LSA)

LSA reports that the bill is prospective and there is not an immediate impact. As far estimating the future, there will be an increase due to the new calculation of "good time" at 75% (the rate for a violent crime); however, it's indeterminable because there are usually other charges at the time of arrest.

Table with 2 columns: Senate, House. Rows for Dual Referral Rules with checkboxes for fiscal cost and tax/fee changes.
