

2020 Second Extraordinary Session

HOUSE CONCURRENT RESOLUTION NO.7

BY REPRESENTATIVE COUSSAN AND SENATOR HENSGENS

ENERGY/OIL & GAS: Memorializes Congress to require the Federal Emergency Management Agency to more efficiently coordinate the removal of dislocated oilfield equipment after natural disasters in Louisiana

1 A CONCURRENT RESOLUTION

2 To memorialize the United States Congress and the Louisiana Congressional delegation to

3 take such actions as are necessary to require the Federal Emergency Management

4 Agency (FEMA) to more efficiently coordinate the removal of dislocated oilfield

5 equipment after natural disasters in Louisiana.

6 WHEREAS, hurricanes that blow through coastal Louisiana, particularly those that

7 come ashore as a Category 3 or higher, such as Hurricane Rita in 2005 and particularly

8 Hurricane Laura in 2020, leave behind destruction and dislocation of people, homes, and

9 equipment; and

10 WHEREAS, Hurricane Laura is estimated to have caused between \$4 billion and \$12

11 billion in damages mostly to Louisiana and mostly in the coastal areas of Southwest

12 Louisiana; and

13 WHEREAS, a component of that damage involves the dislocation of equipment from

14 the oil and gas industry located in coastal Louisiana, including storage tanks, drums, pipe

15 segments, and other equipment used in the oil patch, equipment that is picked up by the wind

16 and water of the hurricane and dropped elsewhere in the coast; and

17 WHEREAS, nearly eighty percent of the land in coastal Louisiana is privately-owned

18 land, so much of the dislocated oil and gas equipment lands on privately-held property; and

19 WHEREAS, some of the dislocated oilfield equipment contains materials that can

20 cause pollution if the tanks and drums are damaged through the dislocation and could also

1 be the cause of marine accidents when they are located in waterways where boat captains
2 do not expect to find such hazards; and

3 WHEREAS, initial efforts to locate and identify equipment displaced by a hurricane
4 include an attempt to identify the owner of the equipment, notify the owner that their
5 equipment has been found, and request that the owner remove their equipment from another
6 person's property; and

7 WHEREAS, the second step in attempting to address the dislocated equipment is the
8 Louisiana Department of Environmental Quality (LaDEQ), the Louisiana State Police, and
9 the Louisiana Oil Spill Coordinator's Office (LOSCO) working in cooperation with the
10 United States Coast Guard and under the auspices of FEMA work to remove any tank or
11 drum that could be the source of pollution in the marsh or could be the cause of marine
12 accidents involving boats and displaced tanks or drums; and

13 WHEREAS, after sources of pollution and immediate hazards are removed by
14 LaDEQ, State Police and LOSCO, the Louisiana Department of Transportation and
15 Development and the Louisiana National Guard, again under the auspices of the FEMA
16 identify the location and nature of additional tanks, drums, and other oilfield equipment
17 dislodged by the hurricane so removal plans can be developed; and

18 WHEREAS, plans for removal of dislodged equipment that is neither hazardous nor
19 polluting include a development of a timeline and an assessment of the potential damage to
20 the marsh that could occur as a result of removal efforts versus the damage that the item may
21 cause by its relocation to the spot; and

22 WHEREAS, because the process is a bifurcated process, requiring removal of
23 hazardous or polluting items first and then removal of the remainder of the equipment, many
24 times a situation arises that results in a displaced tank being bypassed on the way to remove
25 a hazardous or polluting tank when removing all the equipment at the same time would be
26 more efficient, more cost-effective, and require less overall time to remove all the dislodged
27 equipment; and

1 WHEREAS, the FEMA practices and procedures do not allow the removal of
2 nonhazardous, non-polluting items prior to or at the same time as removal of other displaced
3 oilfield tanks, drums, and other equipment, thereby elongating the process and increasing
4 the damage to the private property located in the marshes of coastal Louisiana.

5 THEREFORE, BE IT RESOLVED that the Legislature of Louisiana does hereby
6 memorialize the United States Congress to take such actions as are necessary to require the
7 Federal Emergency Management Agency to more efficiently coordinate the removal of
8 dislocated oilfield equipment after natural disasters in Louisiana.

9 BE IT FURTHER RESOLVED that a copy of this Resolution be transmitted to the
10 presiding officers of the Senate and the House of Representatives of the Congress of the
11 United States of America and to each member of the Louisiana congressional delegation.

DIGEST

The digest printed below was prepared by House Legislative Services. It constitutes no part of the legislative instrument. The keyword, one-liner, abstract, and digest do not constitute part of the law or proof or indicia of legislative intent. [R.S. 1:13(B) and 24:177(E)]
