management system, and slot machine management system as applicable, to which the division and board have complete and unrestricted access to the information contained therein. Likewise the casino operating contract provides for complete and unrestricted access to information contained within their centralized computer to the office of state police and the Louisiana Gaming Control Board. - (4) The most efficient, accurate, and honest regulation of the gaming industry in this state can best be facilitated by establishing a central licensee computer system under which all electronic gaming devices will be linked to that system by telecommunication to provide superior capability of auditing, reporting, and regulation of that industry.
