

1           WHEREAS, the United States Centers for Disease Control and Prevention indicates  
2 that wandering is an important safety issue which can affect people with disabilities, their  
3 families, and the community; and

4           WHEREAS, numerous studies have concluded that children with disabilities are at  
5 much higher risk of experiencing exploitation and violence than their peers who do not have  
6 disabilities; and

7           WHEREAS, examples of such studies include one published in 2012 in the medical  
8 journal The Lancet which found that, overall, children with disabilities are almost four times  
9 more likely to experience violence than children without disabilities, and that the risk of a  
10 child with a developmental or intellectual disability experiencing sexual violence is over  
11 four-and-a-half times greater than that of a child with no such disability; and

12           WHEREAS, as evidenced by its adoption of House Concurrent Resolution No. 53  
13 of the 2020 Regular Session and House Concurrent Resolution No. 84 of the 2019 Regular  
14 Session, both of which addressed potential means of addressing safety issues experienced  
15 by people with autism, the legislature has recently made efforts to find policy solutions for  
16 protecting people with special needs; and

17           WHEREAS, a system for tracking the physical location of children with  
18 developmental and intellectual disabilities could be a means of ensuring the safety of such  
19 children; however, matters such as privacy, cost, duties and responsibilities relating to the  
20 system, and, potentially, other important considerations should be evaluated before any  
21 policymaking body considers implementing a system of this type.

22           THEREFORE, BE IT RESOLVED that the Legislature of Louisiana does hereby  
23 urge and request the office for citizens with developmental disabilities of the Louisiana  
24 Department of Health to conduct a study concerning the feasibility and desirability of  
25 implementing a system for tracking the location of children with developmental and  
26 intellectual disabilities.

27           BE IT FURTHER RESOLVED that in conducting the study called for in this  
28 Resolution, the office for citizens with developmental disabilities shall engage, collaborate  
29 with, and obtain information and perspective from stakeholder groups that advocate for  
30 children with developmental and intellectual disabilities and their families.

1 BE IT FURTHER RESOLVED that the Louisiana Department of Health shall submit  
2 findings from the study called for in this Resolution in the form of a written report to the  
3 House Committee on Health and Welfare, the Senate Committee on Health and Welfare, the  
4 House Committee on Administration of Criminal Justice, the Senate Committee on Judiciary  
5 B, and the David R. Poynter Legislative Research Library on or before February 1, 2022.

6 BE IT FURTHER RESOLVED that a copy of this Resolution be transmitted to the  
7 secretary of the Louisiana Department of Health.

HCR 45 Engrossed

2021 Regular Session

Bagley

Urges and requests the office for citizens with developmental disabilities of the La. Department of Health (LDH) to conduct a study concerning the feasibility and desirability of implementing a system for tracking the location of children with developmental and intellectual disabilities.

Requires LDH to submit findings from the study in the form of a written report to the legislative committees on health and welfare, the House Committee on Administration of Criminal Justice, and the Senate Committee on Judiciary B on or before Feb. 1, 2022.
