

RÉSUMÉ DIGEST

ACT 65 (HB 104)

2021 Regular Session

Wheat

Existing law requires the La. Bd. of Animal Health to consist of the appointment of one dairy farmer selected from a list of persons nominated by organized dairy cooperatives domiciled in La.

New law removes the qualification that the dairy farmer must be selected from a list of persons nominated by organized dairy cooperatives.

Existing law provides for the disposal methods of cremation or deep burial of livestock animal carcasses in order to prevent, control, and eradicate certain diseases of these animals.

New law adds any other sanitary method approved by the U.S. Dept. of Agriculture to the list of accepted disposal methods.

Prior law defined the term "burial".

New law changes the term to "deep burial" but maintains the prior law definition.

Effective upon signature of governor (June 4, 2021).

(Amends R.S. 3:2091(B)(12) and 2131)
