HB 232 Original

2022 Regular Session

Edmonston

Abstract: Prohibits the Department of Public Safety and Corrections, office of motor vehicles, from including vaccination verification or immunity status on any issued driver's license or state identification card and from using such records for the issuance, renewal, or revocation of a driver's license or state identification card.

Present law requires that a state identification card include, upon request, the card holder's blood type on the back of the special identification card. Present law prohibits action by any private citizen, public officer, or employee to create a warranty of the reliability or accuracy of the document or electronic image, or create any liability on the part of the state, department, office, agency of the state, state officer, state employee, or agent of the state.

Proposed law adds a provision that prohibits the Dept. of Public Safety and Corrections, office of motor vehicles (OMV), from making the issuance, renewal, or revocation of a state- issued driver's license or identification card contingent on vaccination verification or immunity status. Prohibits OMV from including any vaccination verification or immunity status information on a state-issued driver's license or identification card.
