SB 97 Original                                      DIGEST                                      2022 Regular Session                                      Boudreaux

Present law provides for the qualifications required for a pharmacist currently licensed in another jurisdiction to apply for a license as a pharmacist by reciprocity in Louisiana.

Proposed law retains present law.

Present law provides that no applicant shall be eligible for licensure by reciprocity unless the state or jurisdiction in which the applicant was initially licensed as a pharmacist also grants reciprocity to a pharmacist duly licensed by examination in this state, under comparable circumstances and conditions.

Proposed law retains the requirement for dual reciprocity but removes the specific requirement that there be comparable circumstances and conditions.

Effective August 1, 2022.

(Amends R.S. 37:1203(B))
