HB 407 Original

2022 Regular Session

Amedee

**Abstract:** Prohibits adding any vaccine with Emergency Use Authorization status to the list of vaccinations required for school and child daycare entry.

Present law requires the state health officer acting through the office of public health of the Louisiana Department of Health to prepare, promulgate, and enforce rules and regulations embodied within the state's Sanitary Code.

Present law requires the rules and regulations of the Sanitary Code to provide for an immunization program and provide for and require the reporting when a test is conducted by a laboratory or hospital, investigation, and application and implementation of appropriate control measures to expressly include isolation and quarantine proceedings and measures, for all communicable diseases of public health significance.

Present law states that no rule or regulation of the Sanitary Code shall impose or create any general duty to warn third parties of any healthcare provider who has complied with the applicable reporting requirements for communicable diseases as set forth in present law.

Proposed law states that no vaccine under Emergency Use Authorization may be added to the list of required immunizations for daycare and school enrollment.

(Amends R.S. 40:4(A)(2)(intro. para.))
