<b>Subject:</b> Instruction		

CURRICULA OR NO IMPACT See Note  
Requires instruction relative to cardiac health in high school

Proposed law requires public high schools to provide instruction relative to cardiac health, which shall be integrated into an existing required course. Requires the Department of Education (LDE), in consultation with the Department of Health (LDH), to establish a clearinghouse regarding curricula, instructional materials, and best practices for instruction on cardiac health.

**EXPENDITURE EXPLANATION**

There is no anticipated direct material effect on governmental expenditures as a result of this measure. Instruction relative to cardiac health is already included in current health education textbooks and health and physical education courses. In addition, the Department of Education (LDE) and Department of Health (LDH) can identify low- or no-cost resources that can be posted on agency websites for little or no costs. The American Heart Association offers a variety of free information and other organizations offer free resources for teachers and students at multiple grade levels. Both LDE and LDH plan to identify free or low-cost resources online through the LDE *Teacher Toolbox Health and Physical Education* page.

**REVENUE EXPLANATION**

There is no anticipated direct material effect on governmental revenues as a result of this measure.
