## **EXPENDITURE EXPLANATION**

Proposed law will result in an increase in SGF expenditures in the Department of Economic Development (LED). Proposed law has one-time estimated costs of \$1.1 M for professional services for consultants used in the creation of the extensive State Plan for Economic Development and associated modeling as outlined in the bill. The recurring \$75,000 professional service costs are associated with the annual action plan report.

LED has indicated current staff and resources should be sufficient to support both the Council and the Advisory Commission for the prescribed meetings and aid in preparation for those meetings. However, the current staff is not capable of performing the modeling and analysis for the State Plan prescribed by the bill. Therefore, LED intends to outsource consulting services to achieve the specified requirements of the bill in the initial fiscal year, and each year thereafter for the annual reporting. The \$1.1 M initial consultant costs may be divided among FY 24 and part of FY 25, as the twenty-year State Plan for Economic Development must be presented to the legislature by December 31, 2024.

In addition, proposed law is anticipated to result in an indeterminable, but minimal increase in state expenditures associated with travel reimbursements. While there may be costs associated with travel reimbursements and administrative support of the council, these costs are expected to be minimal and absorbed within each respective agency's existing operating budget.

## **REVENUE EXPLANATION**

There is no anticipated direct material effect on governmental revenues as a result of this measure.
