- (2) Any public playground.
- (3) Any residential property.
- (4) Any building used primarily as a church, synagogue, public library, or school.

Present law further provides that the measurement of the distance shall be a straight line from the nearest point of the truck stop facility to the nearest point of the property on the National Register of Historic Places, the public playground, residential property, or a building used primarily as a church, synagogue, public library, or school.

Proposed law retains present law.
