SB 433 Original

DIGEST  
2024 Regular Session

Edmonds

Proposed law requires the state Dept. of Education (department) to establish an online Early Childhood Education Data Dashboard to be used to collect and display certain data. Requires that the dashboard be accessible in a user friendly format on the department's website.

Proposed law requires that the dashboard contain the following information that shall be collected and updated on a quarterly basis:

- (1) The number of children enrolled in each publicly funded early care and education program arranged by child care provider type, parish location of provider, age of children, and number of children on waitlists.
- (2) The status of Child Care Assistance Program applications, including the number of applications approved and rejected with an explanation of each status, and if applicable, the total number of families on the waitlist.
- (3) The number of children served in publicly funded early care and education programs compared to the number of estimated overall in-need population.
- (4) The attrition rate of children being unenrolled from publicly funded programs arranged by children who aged out or failed redetermination which shall also be categorized by percentage of the reasons for failing redetermination.
- (5) The funding information for each publicly funded program, including the total appropriation by funding source each fiscal year, funded enrollment, and current reimbursement rates per child by age, provider type, and type of care.
- (6) The number of children enrolled in Type I, Type II, and Type III licensed early learning centers to be arranged by parish.
- (7) The quality rating or performance profile data for each provider and aggregated to show parish-wide and statewide quality trends over time.
- (8) Any other data the State Board of Elementary and Secondary Education (BESE), the department, or the Advisory Council on Early Childhood Care and Education (council) deems necessary.

Proposed law requires the department to provide an analysis of the data collected quarterly to BESE

and the council.

Proposed law requires the department to:

- (1) Develop all procedures and formats for the defining and reporting of all data and statistical components and annually review them.
- (2) Perform the statistical analysis necessary to aggregate the reported data.
- (3) Coordinate all existing and new data collection efforts so as to minimize paperwork at the school and school system level.

Proposed law provides that BESE, with input and guidance from the council, shall provide oversight of the dashboard by reviewing and approving, modifying, or rejecting the data collection system created by the department pursuant to proposed law.

Proposed law requires the dashboard to be fully implemented and publicly accessible no later than August 1, 2026.

Effective August 1, 2024.
