Proposed Amd.: Sub. Bill For.:

Date: May 15, 2024 5:22 PM

Author: LACOMBE

Dept./Agy.: Energy & Natural Resources, Wildlife & Fisheries **Subject:** Allocation/Dedication of Sequestration Revenues

Analyst: Benjamin Vincent

ENERGY/CONSERVATION

RE SEE FISC NOTE SD RV

Page 1 of 1

Provides for the dedication of revenue from carbon dioxide sequestration on state lands and water bottoms

<u>Current law</u> generally allocates revenues from storage of carbon dioxide as follows: 30% to the Mineral & Energy Operations Fund (M&EO), 30% to the governing authority of the parish located in the specific area of interest, and 40% to the state general fund. Certain projects that qualify as "owned" by WLF are not allocated according to the same 30/30/40 distribution, and are fully dedicated to the Conservation Fund.

<u>Proposed law</u> requires revenues from such projects that are beneath properties owned by, managed by, or under the jurisdiction of the Department of Wildlife & Fisheries (WLF) to be allocated as follows: 30% to the governing authority of the parish located in the specific area of interest, and 70% to the Louisiana Wildlife & Fisheries Conservation Fund ("Conservation Fund").

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure, although reductions in dedicated revenues to WLF may eventually require SGF support to maintain existing WLF expenditure levels. LFO notes that Conservation Fund revenues are the means of finance for a significant portion of WLF expenditures, and that maintaining WLF expenditures may require additional general fund support as a result of proposed law.

REVENUE EXPLANATION

Current law generally provides that for carbon dioxide storage projects, revenues from bonus payments, liquidated damages payments, and injection payments are allocated as follows: 30% to parish authorities, 30% to the M&EO Fund, and 40% to the state general fund. Current law additionally provides that certain projects that qualify as "owned" by WLF are not allocated according to the same 30/30/40 distribution. Instead, 100% of such revenues are dedicated to the Conservation Fund.

For such fully-dedicated Conservation Fund revenues, proposed law allocates 30% to parish authorities, and the remaining 70% to the Conservation Fund.

DENR and WLF report that some existing projects are currently allocating 100% of revenues to the Conservation Fund under current law. Proposed law would reduce Conservation Fund revenues from 100% to 70% of amounts in current law, and would increase revenues to parish authorities in these cases. LFO is awaiting detail on existing agreements for all such revenues, however preliminary information from DENR and LWF indicate that **proposed law would effectively redirect at least \$1.4M from the Conservation Fund into local funds in FY25, growing under plausible assumptions to as much as \$6.9M in some years by FY29.**
