Subject: Charter school funding and oversight	

SCHOOLS/CHARTER OR NO IMPACT See Note Page 1 of 1
Provides relative to charter school funding

Present law provides that a Type 1 charter school, Type 3 charter school, Type 3B charter school not acting as its own local education agency (LEA), and Type 4 charter school are considered an approved public school of the local school board for funding purposes. Type 2 charter schools and a Type 3B charter school acting as its own LEA receive a per-pupil amount each year as authorized by the State Board of Elementary and Secondary Education (BESE) under the Minimum Foundation Program (MFP) formula.

Proposed legislation authorizes, with the approval of the local school board, a Type 1 charter school, Type 3 charter school, or Type 3B charter school not already acting as its own LEA to be considered its own LEA for funding purposes. Schools acting as their own LEA will receive a per-pupil funding amount through the MFP formula equal to the allocation based on student characteristics and needs in the district where the student resides, consistent with other charters operating as their own LEA.

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure. For Type 3 and Type 3B charter schools that opt to operate as their own local education agency (LEA), total Minimum Foundation Program (MFP) allocations will not be increased but rather redirected from the governing school district to the individual school. For all charter schools operating as their own LEA would receive federal funding directly and assume responsibility for compliance, reporting, and audits. While this represents a new administrative responsibility, it is not expected to result in an increase in federal revenue to the state or to local governments, as total funding remains unchanged.

Note: The MFP formula currently in effect is not structured to allocate funds to Type 1 charters outside of the local school district. If HB 386 passes as written, the formula would need to be revised by BESE and adopted by the Legislature to account for direct funding to these schools.

REVENUE EXPLANATION

There is no anticipated direct material effect on governmental revenues as a result of this measure. Total state and local funding for a school opting to act as its own LEA remains unchanged; the measure redirects appropriations from the governing school district directly to the individual school. Similarly such a school would receive any federal funding directly and assume responsibility for compliance, reporting, and audits. While this represents a new administrative responsibility, it is not expected to result in an increase in federal revenues.
