Limits the solar energy systems tax credit to one for each residence or for each dwelling unit in a residential rental apartment project. (gov sig)

Current law provides a refundable income tax credit of 50% of the purchase and installation of a residential wind or solar system up to \$25,000 (\$12,500 in credits). The credit is allowed for single family and multi-family residence installations and is issued to the homeowner, installer, or a third party system lessor. The program cost is not capped and does not sunset. The credit is limited to one system per residence.

Proposed law retains current law and specifically states that only one system will be allowed for each residence or dwelling unit in a residential apartment project.
