EXPENDITURE EXPLANATION

The proposed legislation will result in an increase in programming costs of approximately \$1,800 in FY 14 and again in FY 16 to adjust the fees in the electronic licensing system. The department's existing vendor currently charges approximately \$90 per hour for programming and the department estimates approximately 20 hours of work is necessary to make these changes. To the extent that numerous pieces of legislation are enacted requiring programming changes, the department may require additional resources.

REVENUE EXPLANATION

The proposed legislation will decrease revenues to the Conservation Fund for the next three fiscal years. Based on the license sales in FY 12 and assuming the number of license holders remains constant, the estimated revenue decrease would be \$3,022,769 in FY 14 and FY 15 and \$1,395,555 in FY 16.

Note: In FY 17 and beyond, when license fees return to rates in this proposed legislation, license revenues will increase by approximately \$230,000 annually. When hunting and fishing license fees increased in 2000 (Act 1 of the 2000 2nd Extraordinary Legislative Session), through the administrative rule process the Wildlife and Fisheries Commission reduced some of the nonresident annual hunting license increases due to public comments. Pursuant to proposed law, when the fees change back to the rate in proposed legislation on January 1, 2016, those nonresident rates will revert back to the original passed by Act 1 and not the current rate being charged per the Wildlife and Fisheries Commission rule.
