Opp. Chamb. Action:

Proposed Amd.:

Sub. Bill For.:

<b>Date:</b> May 7, 2013 9:40 AM	<b>Author:</b> THIBAUT
<b>Dept./Agy.:</b> Economic Development/Revenue	<b>Analyst:</b> Deborah Vivien
<b>Subject:</b> Adjustments to the R&D Tax Credit	

TAX CREDITS EG NO IMPACT GF RV See Note Page 1 of 1  
Changes eligibility and provides for administrative changes for the Research and Development Tax Credit

Current law provides a refundable income and franchise tax credit for a percentage of eligible Research & Development (R&D) expenditures, the rate of which is dependent upon the number of employees in the firm, split between those with greater than 50 and less than 50. Documentation requirements are specified in the law. The credit expires Dec 31, 2019. Proposed law retains current law but does not allow custom manufacturing/fabricating and professional services as defined by LED to apply for the program, unless invited by LED to participate. The bill also adjusts certain components of the law such as insuring that those firms with exactly 50 employees qualify under the large business statute. The bill allows small business applicants who do not claim the federal R&D credit to submit a report from a CPA showing no benefit if that firm claimed the federal R&D credits. State documentation requirements are more closely aligned with those required for the federal R&D credit. The state will audit 10% of applications each year and may request additional information or recapture credits.

<b>EXPENDITURES</b>	<b>2013-14</b>	<b>2014-15</b>	<b>2015-16</b>	<b>2016-17</b>	<b>2017-18</b>	<b>5 -YEAR TOTAL</b>

**EXPENDITURE EXPLANATION**

There is no anticipated direct material effect on governmental expenditures as a result of this measure. Applicants that claim the federal R&D credit are able to provide certifiable documentation for the state program because both programs are similar. However, the state's R&D program faces an administrative burden when analyzing applications from small businesses that do not take the federal credit. The extensive review required has served to slow the approval process by as much as a year. This bill will require a small business to submit a report from a CPA stating that the firm had no financial benefit from seeking the federal credit. Disallowing custom manufacturing/fabricating and professional services, unless specifically invited by LED, will further reduce the administrative burden on the state as the extensive review will no longer be required for most of these types of firms. This measure should expedite certain administrative duties, though the program will continue to require a commitment to administrative processes.

**REVENUE EXPLANATION**

There is no anticipated direct material effect on governmental revenues as a result of this measure. Expediting the application process for small businesses that do not claim the federal R&D credit may serve to speed the rate at which R&D credits are issued, but should not change the amount of credits issued. According to LED, disallowing the application of custom manufacturing/fabricating and professional services firms to the R&D program (unless specifically invited by LED) is a codification of current practice, though a review was required before the firm could be denied access to the program. This component of the bill will eliminate the need for an upfront review and is anticipated to be mostly an administrative change.
