Subject: Changes the oil spill contingency fee and removes limits		

ENERGY/OIL & GAS RE2 SEE FISC NOTE SD RV See Note Page 1 of 2

Changes the oil spill contingency fee both in amount and application and removes limitation on expenditures from the Oil Spill Contingency Fund

Present law provides funding of oil spill response activities with a 2 cents per barrel fee levied on crude oil transferred at marine terminals. Funds are deposited in the Oil Spill Response Fund; limits the balance in the fund to \$30 million; provides for allowable and limited usage of monies in the fund; provides that the fee increases to 4 cents when the balance in the fund is less than \$5 million, when an unauthorized discharge of more than 100,000 gallons occurs, or when allowable expenditures from the fund are expected to deplete more than 50% of the fund balance; provides that once initiated the fee shall continue until the fund balance equals \$7 M at which point the fee shall cease. Proposed law defines refinery to mean a facility located within Louisiana where crude oil is converted into a finished or higher grade product; removes the \$30 M fund ceiling; removes limits to certain allowable uses; levies a base fee on the operator of a refinery of 1/4 cent per barrel, rising to 1/2 cent per barrel for specified initiation and cessation triggers (floor of \$5 M, ceiling of \$7 M, and 100,000 plus gallon spill). Provides for a study to be conducted by the Oil Spill Interagency Council. Provides for effective date.

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure. The Department of Revenue (DoR) reports that the fees are currently processed manually and proposed law would result in no change in expenditures.

For informational purposes, the FY 14 recommended appropriations from the Oil Spill Contingency Fund:

Public Safety - La Oil Spill Coordinator's Office	\$1,865,636
Wildlife and Fisheries - Office of Wildlife	\$ 302,000
Natural Resources - Coastal Management	\$ 175,763
Department of Environmental Quality - Environmental Compliance	<u>\$ 156,145</u>
	\$2,499,544

Revenues projected by the base fee in proposed law exceed the FY 14 recommended appropriation level by approximately \$700,000, a substantial reduction from recent excess collections (see revenues below). Monies in the Oil Spill Response Fund are used to immediately provide available resources for response to all threatened or unauthorized discharges of oil, clean up, damage reparation, and removal costs from threatened or unauthorized discharges of oil. To the degree that future oil spill events require state action, the reduced revenue levels may potentially create a need for increased SGF expenditure authority to facilitate oil spill responses in the event the fund balance at the time of the incident is insufficient to cover the response need.

REVENUE EXPLANATION

Proposed law may result in a decrease in revenues deposited into Statutory Dedications - Oil Spill Contingency Fund. Proposed law broadens the fee base from one based on the barrels of crude oil transferred to or from a vessel at a maritime terminal within Louisiana to one based on the barrels of crude oil received by a refinery for storage or processing. The base fee is lowered from \$0.02 per barrel to \$0.0025 per barrel. In the instance that the fund balance falls below \$5 M, or certain other conditions exist, the base fee increases to \$0.005 per barrel until the State Treasurer certifies the fund balance has reached the designated threshold of \$7 M. An amendment adopted by the Senate Finance Committee stipulates that the base fee shall be levied at a rate of \$0.005 per barrel until December 31, 2015.

In the wake of the Deepwater Horizon oil spill event that began on April 20, 2010, the Louisiana Legislature passed legislation to facilitate state response to emergency oil spill situations. Specifically, Act 962 of the 2010 Regular Legislative Session provided that the \$30 million ceiling on monies in the Oil Spill Contingency Fund shall be discharged during a declared state of emergency or disaster caused by an unauthorized discharge of oil. Act 962 also removed the provision for cessation of fee collection once the fund balance reached the \$7 M threshold as per present law. Governor Jindal issued Executive Proclamation No. 20 BJ 2010, on April 29, 2010, declaring a state of emergency in response to the Deepwater Horizon event. The emergency declaration has been extended each month since that time through renewal proclamations. As a result, revenues deposited into the Oil Spill Collection Fund have continued unabated and without

Proposed Amd.:

Sub. Bill For.:

Date: June 3, 2013	10:05 AM	Author: DANAHAHAY
Dept./Agy.: Public Safety, Natural Resources, etal.		Analyst: Alan M. Boxberger
Subject: Changes the oil spill contingency fee and removes limits		

CONTINUED EXPLANATION from page one:

regard to the existing fund balance since April of 2010, driving the annual collections above historical averages. To the degree that the executive proclamations related to the Deepwater Horizon event continue into the future, proposed law would have a greater impact on deflating revenues that would occur in the absence of a declared emergency.

Over the past five fiscal years, collections in the Oil Spill Contingency Fund were as follows:

FY 12	\$7,427,333
FY 11	\$5,788,555
FY 10	\$ 161,134
FY 09	\$ 99,895
FY 08	\$6,604,273

Collections were suspended during the majority of FY 09 and FY 10 due to the fund balance exceeding the \$7 M ceiling.

The IRS identifies 25 active refineries in Louisiana as of March 31, 2013. During calendar year 2012, the Department of Natural Resources SONRIS system summarized refinery acquisitions of crude oil at approximately 1.3 billion barrels. Using the proposed base rate of \$0.0025 per barrel, the estimated revenues would total approximately \$3.2 million annually, or a decrease of \$4.2 million below FY 12. Due to the ongoing executive proclamations extending the state of emergency caused by the Deepwater Horizon event, current revenue collections are artificially inflated compared to historical collections. In the absence of a state of emergency, revenue collections in FY 12 would have been \$0 under present law. To the degree that the executive proclamations of a state of emergency continue to be extended, proposed law would have a significant negative impact on revenue collections ranging from a decrease of \$2.5 M compared to FY 11 collections up to the aforementioned \$4.2 M compared to FY 12 collections. Relative to collections in non-emergency periods, proposed law would have a relatively small effect on revenue collections. The annual impact may be larger or smaller dependent upon the number of barrels received annually by refineries. In years where an event triggers the increased \$0.005 per barrel fee (balance falls below \$5 million or an unauthorized discharge of more than 100,000 gallons), the annual collection may grow to approximately \$6.4 million annually. **The amendment adopted by the Senate Finance Committee stipulates that the base fee shall be levied at a rate of \$0.005 per barrel until December 31, 2015, which will result in an annual collection of approximately \$6.4 million through that time.**

Proposed law removes the \$30 M ceiling on the Oil Spill Contingency fund balance.
