EXPENDITURE EXPLANATION

The proposed legislation could impact funding allocations to charter schools. The students in these charter schools will generate the same amount of funding through the Minimum Foundation Program formula, but the amount that each school will be allocated as a result of this legislation could be impacted. The legislation is not clear as to how the school district is required to distribute Minimum Foundation Program funds for these schools.

REVENUE EXPLANATION

The proposed legislation authorizes the Department of Education to retain through the MFP 1/4 of 1% of a 2% fee (applied to the total per pupil amount) that would be collected by local school boards from Type 3B charter schools for administrative overhead costs. This is not an additional fee to the charter schools. The Department of Education will retain a portion of the fee collected that would otherwise be collected by the local school board. The total fees collected by local school boards could decrease and fees collected by the Department of Education could increase by 1/4 of 1%.
