

Existing law establishes the procedure by which a hospital service district in Jefferson Parish may sell or lease a hospital. Requires the governing authority of the district to obtain voter approval of any such sale. Prior law provided that a lease of a hospital was also subject to voter approval. New law removes the requirement for voter approval of a lease.

Existing law requires voter approval of the sale or lease of revenue-producing property by a political subdivision of the state that is authorized by the constitution to issue bonds. Provides exceptions to this requirement. New law exempts the lease of a hospital by a hospital service district in Jefferson Parish from existing law.

Effective upon signature of governor (June 5, 2013).
