EXPENDITURE EXPLANATION

There may be an increase in local governmental expenditures as a result of this measure.

According to an official with the Secretary of State's Office, should an election be required, the parish wide election in Jefferson Parish would cost approximately \$300,000. However, this proposition election would likely be held on a date that already has scheduled elections. Adding one more item to an existing election would have minimal impact on the cost of the election. It would affect the amount each local government entity having ballot items would pay because costs are prorated based on the number of ballot items.

According to officials with the Jefferson Parish hospital service districts, additional expenditures may be incurred for public education in connection with the election.

REVENUE EXPLANATION

There is no anticipated direct material effect on governmental revenues as a result of this measure.
