

SENATE RESOLUTION NO. 133

BY SENATOR HEITMEIER

A RESOLUTION

To recognize the month of September 2014 as "Pain Awareness Month" in Louisiana.

WHEREAS, over one hundred million American adults suffer from chronic pain, including millions with debilitating conditions such as chronic lower back pain, fibromyalgia, and arthritis; and

WHEREAS, chronic pain costs America up to six hundred thirty-five billion dollars a year in added health costs and lost productivity, including billions of dollars in Medicaid costs; and

WHEREAS, chronic pain is a major public health problem and hidden driver of rising health care costs; and

WHEREAS, significant barriers to adequate pain care exist, including regulatory, legal, institutional, financial, and geographical barriers, and as a result, millions of Americans settle for inadequate pain care; and

WHEREAS, pain and pain treatment, represent a national challenge and cultural modifications are needed to better prevent, assess, treat, and understand pain of all types; and

WHEREAS, these findings regarding chronic pain were made by the Institute of Medicine (IOM) of the National Academy of Sciences in its landmark report issued in 2011, *Relieving Pain in America: A Blueprint for Transforming Prevention, Care, Education, and Research*; and

WHEREAS, the IOM report includes a number of recommendations to improve pain care, education, and research; and

WHEREAS, the IOM report found that significant savings could be achieved through better treatment of acute pain, such as a reduction in workers' compensation costs, an end to significant lost tax revenues, and a reduced burden of the societal costs of opioid abuse and misuse; and

WHEREAS, the IOM report urges that the nation should develop a comprehensive plan that heightens awareness about pain and its health consequences, emphasizes the prevention of pain, improves the assessment of pain and plans for management of that pain, uses public health strategies to educate the public, and addresses the disparities in the experience of pain among Americans; and

WHEREAS, by naming a "Pain Awareness Month" in the state, the Louisiana State Senate is taking a positive step in heightening awareness of pain, particularly chronic pain, and its health consequences; and

WHEREAS, chronic pain is a serious health problem and the appropriate agencies of state government should examine how the state can improve the health and productivity of its citizens and reduce personal and government health care expenditures by implementing the recommendations of the IOM report.

THEREFORE, BE IT RESOLVED that the Senate of the Legislature of Louisiana does hereby recognize the month of September 2014 as "Pain Awareness Month" in Louisiana.

BE IT FURTHER RESOLVED that a copy of this Resolution be transmitted to Darrick LeBeouf of Pfizer, Inc., in New Orleans.
