**EXPENDITURE EXPLANATION**

The proposed legislation may result in an indeterminable but likely marginal increase in state general fund expenditures to the extent a defendant is convicted of supplying a child under the age of 12 with an Uzi submachine gun. Since the bill creates a new crime, it is not known how many individuals will be convicted of this crime.

Any offender sentenced to the custody of the Department of Public Safety and Corrections increases expenditures by \$24.39 per day per offender in local facilities. The annual increase of state general fund expenditures for a defendant convicted of this crime and sentenced to the custody of a local facility would be \$8,902. To the extent that offenders are sentenced and housed in state facilities, the cost per day per offender is \$51.62. The annual increase of state general fund expenditures for a defendant convicted of this crime and sentenced to the custody of a state facility would be approximately \$18,800. Currently, the Department of Corrections houses approximately 50% of state offenders at the local level and approximately 50% at the state level.

**REVENUE EXPLANATION**

There is no anticipated direct material effect on state governmental revenues as a result of this measure. However, revenue generated through the imposition of fines as a result of conviction would accrue to local governmental entities.
