Page 1 of 1

Requires recovery of motion picture investor tax credits issued in violation of the tax credit law or its administrative interpretation and those issued to an investor convicted of a criminal violation related to such tax credits. (gov siq)

Current law provides a transferable income tax credit for 30% of qualified expenditures related to motion picture production with an additional 5% for payroll of Louisiana residents. Claiming the credit requires submission of an audit report of qualified expenditures for the motion picture tax credits by a certified accountant.

Proposed law disallows credit eligibility to any company or person charged with or convicted of a criminal violation related to tax credits. If credits were already granted, the bill allows them to be invalidated should these provisions become known. The bill allows the Department of Revenue to increase a violator's income tax liability by the amount of the invalidated credits and begin recapture efforts in the same manner as delinquent taxes, including interest and penalties. The bill is retroactive and severable.

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure.

REVENUE EXPLANATION

The bill provides an additional means under which the Department of Revenue may act to invalidate and recoup film production tax credits, including the full force of collecting delinquent tax debt. This would include wage garnishment, seizure of assets and bank account levies. To the extent that those with criminal charges related to tax credits have the means, this bill could allow an immediate recoupment of tax credits which would presumably be considered general fund receipts, though such recoupments may be considered a debt recovery, which could be a dedicated receipt.

With a retroactive provision, the impact could be more immediate should pending situations be resolved by this bill.
