

RÉSUMÉ DIGEST

HCR 4

2015 Regular Session

Simon

Expresses the intent of the legislature that existing law, R.S. 37:1271(B)(2)(a), establishes the standard of care that physicians are required to use in the practice of telemedicine. Declares that any administrative rules proposing to establish a standard of care for telemedicine that differs from the standard specified in law are inconsistent with the intent of the legislature.
